Editorial

By Maggie Thompson

I'm back in the office after more than a week of lolling about on vacation, of which more later. This seems an excellent time to pick up on bits and pieces in one of those miscellaneous exercises in which I indulge from time to time.

➽ For example, there's been a sudden influx of mail from a number of sources, the writers of which are once again writing anonymously. I remind such writers that, in order for me to do anything besides pitch correspondence in the wastebasket as soon as I realize it's an anonymous piece, I have to have the writer's name and full address. A city and state do not constitute a full address, and you're wasting 32¢ postage every time you send me a letter without full identification of yourself.

➽ Part of my vacation lolling occurred in the emergency room of Riverside Hospital, as a persistent novocaine-like numbness in my lip led me to be concerned about a potential brain tumor or stroke. The last time this sort of vacation drain bugged me this much was when I got chickenpox the first day of spring vacation (during what grade? second? third? fourth?) and was recovered enough by the end of "vacation" to go back to school. I suppose that puts it in perspective (especially since I actually had a wonderful vacation this time around) — though I must say my thoughts as I was tied up to be put into the CATscan equipment involved *2001* and all the high-tech equipment therein.

To put you out of suspense, I am happy (putting it mildly) to say it was neither tumor nor stroke. I have, instead, another of those weird afflictions which I seem to get occasionally: one in which the doctors agree they don't know what causes it, one for which they have no dependable medication, but one which is merely a major annoyance for a while. In this case, it's Bell's Palsy (what a great name) — affecting that same nerve the dentist (yes) numbs with novocaine when necessary. This is, mind you, a bit closer to a spot where it affects more of the nerves on the left side of my face — but it's not so extreme as to cause nasty distortion. Except when I laugh — or eat or drink. On the other hand, it's neither so extreme as to provide the "drooling" symptom that can occur nor to cause the excruciating pain that (I gather) can accompany it.

So I'm in for a time (best estimate at this point is a couple of months) of having to drink my coffee through a straw and holding a napkin in front of my face when eating anything more complex than an after-dinner mint.

➽ More tips about writing to ***CBG***: If you're sending something to me for editorial use (as you do when, for example, you write a letter to *Oh, So?*), please at least write "Editorial Dept." or "Oh, So?" or a similar designation. I've just received a several-page letter addressed only to "Comic Buyer's Guide" which took a while to get through the system, since many people and departments are connected with our publication. (Our publication, by the way, is titled "Comics Buyer's Guide," — and few, indeed, get that title right.)

Carl Icahn, bondholders announce plan to ditch Perelman Marvel board

Marvel Entertainment Group opposes Icahn move

By Maggie Thompson

Financier Carl Icahn, backed by a group of Marvel bondholders, announced March 21 that Marvel's board of directors would be replaced with new board members March 25. In a public statement, the group said its "due diligence reveals that Marvel is in complete disarray and immediate action is necessary to save the company."

Marvel Entertainment Group Inc. released a brief statement later on March 21 saying, "The secured creditors and Marvel intend to oppose [Icahn's] efforts to take control of the Board and will seek the aid of the court to compel Mr. Icahn finally to present a specific plan for the company's reorganization."

They were the latest moves in a continuing struggle among financial forces involved with Marvel — the two sides aligning with Ronald Perelman and his Andrews Group or with Carl Icahn and The Official Committee of Bondholders of Marvel Holdings Inc., Marvel (Parent) Holdings Inc., and Marvel III Holdings Inc. Marvel Entertainment Group filed for reorganization under Chapter 11 of the U.S. Bankruptcy Code at the end of 1996.

The first announcement primarily consisted of a letter from bondholders' counsel David Friedman to Marvel counsel Harvey Miller to notify Miller that at 9 a.m. March 25, "the members of Marvel's board of directors (the 'Old Board') would be removed and replaced with the new board members (the 'New Board')."

The letter was highly critical of financial handling of Marvel Entertainment Group, including such remarks as, "Marvel already has suffered the damage of six months spent recklessly promoting the interests of the Andrews Group and unadvisedly seeking to enrich the Toy Biz inside shareholders." It added that Icahn's already-proposed plan to put a $365 million capital investment into the company would be put into "the highest and best use under the terms of a plan of reorganization to be proposed by the New Board," and said the plan would be presented in less than a month.

There was no public announcement concerning how the plan would improve on how matters have been conducted in recent months.

In its March 21 response to the bondholders' statements, Marvel Entertainment Group Inc. termed them "inflammatory" and "untrue" and said they "do not serve the best interests of the company and its stake holders."

The Bondholders' Committee includes High River Limited Partnership (chairman, and owned by Icahn), Westgate International L.P. (vice-chairman), and United Equities Commodities Company, Jeff Schultz Investments, Whereco Inc., and M3 LLC. Its letter reiterated that it would guarantee a $365 million capital infusion pursuant to a rights offering, subject to the replacement of the Marvel Board and confirmation by the Delaware Bankruptcy Court of "an acceptable reorganization plan."

The proposed 'New Board'

Seven members would be selected by the Bondholders' Committee:

- Entertainment accounting specialist Harold First
- ACF Industries Inc. Treasurer Robert Mitchel
- Carl Icahn
- Icahn Associates Vice President Juoko T. Tamminen
- Voyager Communications Co-Founder Winston Fowlkes III
- Westgate International L.P. Portfolio Manager Vincent J. Intrieri
- Biotechnology General Corp. and LIVE Entertainment Inc. Director Charles K. MacDonald

The two remaining members would be selected by Marvel's Committee of Equity Security Holders.

It challenged Icahn to "expound a detailed, feasible plan" for Marvel operations and added, "Rather than issuing press releases, Mr. Icahn should at long last face up to his responsibilities by explaining precisely how he intends to safeguard Marvel's future."

According to the March 12 *Wall Street Journal*, when Perelman effectively turned control of the company over to Icahn March 7, the banks, led by Chase Manhattan Bank, felt that they had lost "an important source of repayment."

According to the report, under the Icahn plan, the banks could accept an immediate repayment plan which would only pay 85% of the loan or take a $200 million payment immediately and restructure the remaining $430 million debt for later repayment through Marvel cash flow.

An official of Chase Manhattan was quoted in the story as saying, "We really expect our loans to be paid in full."

Sales, income drop for Toy Biz

Toy Biz reported a 32% drop in fourth-quarter net sales compared to last year's fourth quarter and faces an uncertain future, as a previously announced potential merger with Marvel Entertainment Group hit a roadblock.

For the quarter, Toy Biz reported a net loss of $2.5 million or 9¢ per share, compared to a net income of $11.7 million or 43¢ per share for the fourth quarter one year ago. For the year, Toy Biz experienced a 42% drop in net income, from $28.4 million last year to $16.7 million this year, despite an increase in net sales from $196.4 million to $221.6 million.

Toy Biz spokespersons attributed the fourth-quarter results to a disappointing Christmas season.

Toy Biz's sales are primarily fueled by products based on characters owned by Marvel, which is going through a painful Chapter 11 reorganization. Ronald Perelman's Andrews Group has withdrawn its reorganization plan, which included an offer to purchase new Marvel shares and would have further cemented ties between Marvel and Toy Biz. A bondholders' committee led by Carl Icahn has seized control of the reorganization process.

The value of Toy Biz shares dropped 21% immediately following news of Perelman's withdrawal. Confidence in Toy Biz's future has been further eroded by public statements from representatives of the bondholders committee that they may push to end Marvel's licensing agreement with Toy Biz.

Toy Biz's board of directors announced March 20 that it had authorized the repurchase of up to 3 million shares of the company's stock at prevailing market prices. Toy Biz CEO and President Joseph Ahearn said, "The company believes Toy Biz stock is undervalued, and the purchase of our common stock at current prices is a very favorable investment opportunity."

The following day, Marvel Entertainment Group said that the stock buyback would require consent from its Marvel Characters Inc. Subsidiary. Toy Biz stock closed Friday, March 21 at 10⅛, up 3.85% over the previous day's close of 9¾.

James Robinson acquires 'Cable' in May

By Matt Brady

In a move that may came as a surprise to fans of the X-titles and his other work, James Robinson has signed on as the regular writer of *Cable* beginning in May and continuing for "as long as it's fun for me to write," he said.

Robinson added that the decision to write Cable had come as a surprise to him, as well. "I was at the Marvel 'X' writer's conference in New York, and *Cable* didn't have a writer. I had an epiphany and decided right there on the spot to write the series. I think the Marvel editors were fairly surprised, as well."

While he said the character of Cable has proven to be one of Marvel's bigger challenges to write, Robinson added he's looking forward to the challenge of writing a character with a messy past. "The problem with Cable from the onset is the incredibly convoluted continuity," Robinson said. "Cable's continuity has almost become the star of the series, with Cable himself as a supporting character in his own title.

"What I plan to do within the first six months is establish Cable with the premise that you don't need to know anything about his past to read this comic book. If you know about his time travel, his past, or his parentage, that's just icing on the cake."

Robinson also revealed that he'd found a more classical influence for Cable than most fans would have considered.

"Without wanting to sound completely pretentious, one of the characters I'm using as a 'role model' for Cable is Shakespeare's Coriolanus, the tired, noble warrior who can never quite shake off the dust from the battlefield."

In the upcoming "Zero Tolerance" storyline in the X-titles, Cable will cut his ties with X-Force permanently, something Robinson said he is happy with. "That move frees me up, so I'm not tied to X-continuity. I want to make Cable a Marvel character instead of an X-character. He'll have the feel of a knight errant, someone with ties to Camelot, but out on his own, doing noble deeds and having his own adventures. He's only going to meet Marvel characters for a while. I want him to run into The Black Panther, The Inhumans, and Captain America fairly soon."

Finally, Robinson said that he sees Cable as something slightly different than the character was originally envisioned.

"He was originally supposed to be a metaphor for a connection between present and future X-Men continuity. I'm going to use his namesake as a metaphor for a link between the X-universe and the Marvel universe. It's a challenge I'm looking forward to."

Daleks and 'Blake's 7' creator Terry Nation dies at 66

Terry Nation, a creative force in British science-fiction television, died March 9 at 66. Nation, who created the *Blakes 7* series for BBC-TV and the Daleks, the fearsome-yet-staircase-impaired alien menace for *Doctor Who*, had been in poor health in recent years and died at his home in Los Angeles, *The Times* of London reported.

Nation was born in 1930 career as a free-lance scriptwriter began with comedy scripts for *The Goon Show* and Peter Sellers and adventure scripts for *The Saint*.

A science-fiction fan, Nation came to national attention after introducing the giant-salt-shaker-shaped villains, The Daleks, in a 1963 story for *Doctor Who*. (Nation reportedly found the creatures' name on the spine of an encyclopedia, "DALEK.")

The creatures appeared in many further adventures and two feature films, *Dr. Who and the Daleks* and *Daleks — Invasion Earth 2150 A.D.*, and gave Nation the status to create his own BBC series.

He created the post-apocolyptic series *The Survivors* in 1975, cloistering his own family for nine months to research the project.

Much more successful was his space adventure series *Blakes 7*, which premiered days after the opening of *Star Wars* in London and attained a cult following worldwide. Nation wrote 19 episodes during the series' four-year run, including all for its first season.

He is survived by a wife and daughter.

TOTALLY DARK HORSE!

MASS O' MEDIA

By Matt Brady

☆ The latest, and often rumored to be dead, Bond film begins filming April 1 in the U.K. Entitled *Tomorrow Never Dies*, the film returns James Bond to the big screen for the 18th time, with **Pierce Brosnan** reprising his role as 007. Joining Brosnan will be Michelle **Yeoh** as the latest "Bond girl," and **Jonathan Pryce** as the bad guy, this time, a media mogul who's itching to start World War III so he can score a ratings coup.

Producers of the film had to do some last-minute shuffling to find a new location to film, when the government of Vietnam took back its offer of hosting the movie cast and crew. The official reason: Vietnam says it doesn't have the "technical infrastructure" to handle a 200+ person movie crew. Others have suggested that filming the exploits of one of the most famous Communism-busters wouldn't have sat too well with Communist leaders. In any case, the cast and crew went to Thailand, instead.

Tomorrow Never Dies is expected to wrap filming Aug. 15, and be in theaters by Christmas.

Incidentally, the crew isn't doing its studio shooting at Leavesden Studios in England, where *GoldenEye* was filmed. Seems there's this guy named Lucas who has the place contracted through the end of the century. Something about a star and some wars.

☆ The Cartoon Network gained more than 9.4 million subscribers between December 1996 and March 1997, making it the fastest-growing cable channel during the period. Other genre channels making big gains: The Sci-Fi Channel (more than 3.5 million homes) and the Disney Channel (more than 3.15 million homes).

☆ Want more *Toy Story*? Following the successes of its other straight-to-video movie follow-ups, Walt Disney and Pixar Animation Studios have announced that they will release a made-for-video sequel to 1995's *Toy Story*. Both **Tim Allen** and **Tom Hanks** have agreed to reprise their roles as Buzz Lightyear and Woody, respectively.

Though there is as yet no word on the story or title, this announcement came close on the heels of a press conference where Disney CEO **Michael Eisner** announced that Disney would co-finance five more movies with Pixar over the coming years. Look for the sequel to *Toy Story* to hit shelves sometime in 1998.

☆ Carolco, the studio behind such '80s blockbusters as *Total Recall, Basic Instinct, Stargate, Cliffhanger, Terminator 2*, and the Rambo films — and former home of **James Cameron** — has closed its doors for good and is currently in liquidation. As part of the liquidation, Carolco will sell its rights to properties including the aforementioned properties, and the sequel, prequel, and remake rights to Carolco's entire library.

Carolco's **Alice Neuhauser** said that the sale of the Carolco library has generated a lot of interest throughout Hollywood. When an acceptable offer comes in, it's documented and kept until the particular property comes up for auction.

Although the bulk of Carolco's properties are currently unscheduled for auction, Disney's Miramax imprint bought the full rights to 1990's *Total Recall* for $3.15 million in early January. Miramax has announced plans to begin a *Total Recall* "project" sometime in late '97 or early '98, through its Dimension Films label. **Arnold Schwarzenegger** is rumored to already be on board, perhaps in a more official capacity than star. Look for Fox, which has a production-distribution deal with Cameron, to make noise about grabbing *Terminator 2* and Universal, which has a multi-picture deal with **Sylvester Stallone**, to go for the Rambo and *Cliffhanger* rights.

Additionally, the demise of Carolco may actually aid in clearing up the tangled web of litigation surrounding the Cameron-helmed Spider-Man movie. It looks as if Carolco, Canal Plus, and Metro-Goldwyn-Mayer might soon reach an agreement which would grant film rights to the character to MGM.

☆ According to *Variety*, Paramount and the IMAX Corporation are in serious talks to produce a 3-D IMAX film based on one or more of the *Star Trek* properties. While no one has signed any deal just yet, both Paramount and IMAX expressed optimism regarding a deal. The proposed film would feature extensive CGI graphics and have a budget in the $10 million range. If the movie comes out, it could send Trekkers scrambling to find an IMAX theater. With 149 IMAX theaters currently in operation in 22 countries, IMAX has a backlog of 45 theaters it plans to open in the next few years.

☆ James Cameron said he is ready to make another jump forward in moviemaking: computer-generated actors.

His latest action project in development, *Avatar*, promises no less than 12 CGI people. Cameron told *Wired* magazine that his CGI team is working to develop tools that will allow them to integrate animation, motion capture, and live action in a photorealistic manner.

Still characteristically mum about the plot, he did reveal that the film won't be set in a computer reality or rely heavily on computer knowledge, a death knell for films that try to cash in on popular computer culture.

Cameron is aware of the risks, however. "These are supposed to be real people, real characters," he said. "If we can pull it, *Avatar* will be the coolest film ever made. If not, we'll have egg on our faces, but that's never stopped me before."

When Kim Yale became my editor some years ago, I was prepared to give her a hard time. That's part of the writer's job: giving editors a hard time. After all, they get to hang out in nice offices, collecting a paycheck whether they accomplish anything or not, while we freelancers have to produce some actual work before we get paid. And to top it off, they presume to pass judgment on what we've produced, even if they don't know how to write or draw themselves.

Well, Kim could write. I knew that. But I was still ready to make her life miserable, if it became necessary.

And then, wouldn't you know it, she taught me stuff. She helped me to become a better writer. Not just by quizzing me on story structure and characterization. She called me on my use of language — an area where I take very little guff from editors — and prodded me to say things better. To avoid clichés and words that just hung there, taking up space. Sometimes, we'd argue about language and eventually we'd either wind up where I started or go where she pointed. But it was never about one of us winning or losing. Instead, toiling together, we figured out what worked. She brought insight to the stories I was trying to tell, without imposing any edicts about the "right way" to tell them.

And after that, when Kim was no longer at DC, and we'd see each other at conventions, we'd talk about the stories we both wanted to tell: stories full of excitement, because they went to brand-new places; stories for boys and for men and for women and for girls. She was always filled with enthusiasm about that next new plan to shake up the world of comics. And I never saw her enthusiasm flag, even in the face of illness. To me, at least, she always looked like someone moving toward a bright future.

I said before that Kim could write. She told a story once about a girl who tried to live a life filled with joy in a world filled with evil. But the girl could not escape the dangerous designs of those who would lay her low. It was the story of the sleeping beauty, put in a contemporary urban setting. And in Kim's version, the pinprick that brought unasked-for slumber to the maiden did not come from a spinning wheel. It came from a junkie's needle.

I was startled by that story — startled by the insight Kim had brought to it and by the fresh truth she'd discovered in a fairy tale so old. I suggested that she recast it as a children's book, though I don't have a clue who would have published a work of such disturbing insight for the children's market. Maybe it could only be done in comics. Which might explain why Kim and I and so many others have chosen to craft our stories in this medium.

I only wish that she could unsettle me again with the depth of her perception. I think I'll miss her capacity to be a truth-telling troublemaker (high praise for a writer) as much as I will miss her warmth, her buoyant spirit, and her rambling conversation. And those, I'll miss a lot.

Kim Yale died.

I don't know if you were ever lucky enough to have met her. I did. And I thought very highly of her and John both.

I am at a loss for words.

She was not only a great person, but a real professional.

I loved much of her work.

I really, really hope that somewhere there is an incredibly talented person just getting into comics, because we just lost one and we need every one we can get.

Godspeed, Kim.

Steve Sullivan

When I think of my friend Kim Yale, the first word that springs to mind is "enthusiasm." I have met few people who so loved life that nearly every moment of it seemed to be a joy for them. Kim was one of those people. She loved trying new things and meeting new people.

This is not to say that she was one of those folks who seek a never-ending parade of thrills to numb the senses — far from it. Rather, Kim was intensely curious, completely eager to learn and experience new things.

And unafraid. I don't think I ever saw her afraid of anything. Nervous, maybe, but never afraid. Perhaps John, God bless him, did — he was much closer to her than any of us. But I never saw her scared, nor did anyone I can think of. Things other people might fear, Kim merely saw as obstacles to overcome.

In her columns, it seemed to me as though she treated cancer the same way: not with fear but with quiet confidence and determination.

This facet of her personality was so strong, in fact, that I couldn't even

From Page 12

conceive that she wouldn't beat the disease. C'mon! This is Kim Yale we're talking about — fearless Kim. I was so unconcerned that I didn't even catch up on the news in ***CBG*** until recently. I just saw her columns and said to myself, "There she is, still plugging away. Glad she's getting better." And I put a lot of issues aside, including her columns, to read later.

It was just over a week ago that I finally got around to catching up. At that time, I said to my wife, Kiff, "I'm kinda worried about Kim. She's still fighting this thing, and I thought she'd be better by now."

I made a mental note to go online and say hi again. It had been a while since I'd written her, though I prayed for her recovery nearly every night. No rush, though. This was Kim, after all. She was going to get better.

Then I read Tony's column last Friday and discovered that she wasn't going to get better. The realization hit me like a ton of bricks.

I quickly got online and fired off a note to John, wishing them both well. Then I went to the message boards and chased down John's original message. I read the associated posts, then scrolled down and, sadly, found another, newer message.

It said that Kim was home from the hospital and not doing so well. I fired off another supportive letter, then read the rest of the missives attached to that note. The main message had been dated last Thursday, March 6, the day before I got back on line. I started to think of what kind of things I might do to cheer up my brave friend who was fighting a losing battle. I came up with a few ideas I thought Kim would like. I even made plans to enlist my kids after their nap time.

Then I scrolled down further in the news group and discovered it was too late; my friend Kim, the indomitable one, had died that morning.

God, I miss her. There are some people who make the world better just by being there, even if you don't see or talk to them as often as you probably should. Kim was one of those people.

And the really astonishing thing is, from what John's said, she remained unafraid until the end. You see, she always looked forward to experiencing new things. And, I suppose, this was just one more of those things — the final thing she could share with those of us still here. I wish she could write a column about it. I bet it would have been a humdinger. I'll have to ask her what it would have said, next time we meet — though I hope that'll be a while yet.

And I hope, when my time comes, I can face death as boldly as Kim did. (Maybe the only braver person I can think of is John. How he's managed to be so courageous and share all this with us is beyond me. Thank you, John.)

But, until Kim and I meet again, I'll always cherish the memories I have of her. Long talks at parties about the state of the industry and what could be done to improve it, discussions of favorite films and comics; showing her around Milwaukee the first time she visited here — going to restaurants, walking along the lake shore, watching the Perseid meteor shower over Lake Michigan; the animated discussions at conventions and panels. So many memories and not a bad one in the lot.

And the enthusiasm. Always, her indomitable enthusiasm. It showed through in everything she did, even the way she said "Hello."

Goodbye, Kim. God bless. All of us are poorer for your passing.

I'll be watching a movie you liked in your honor and memory. And, when things stop hurting, I'll gather with some friends who knew you and drink a toast to one of the finest people I've ever known.

With love to you and John.

In your editorial in ***CBG*** #1206, you expressed some concerns about what becomes of comics and other entertainment media when people can reproduce them over the computer networks at no cost. I'm going to specifically focus on comics and the World Wide Web, two topics that I have reasonable credentials in (as a comic-book writer — I hope everyone's picking up *Big Bang* #8 — and as the author or co-author of several books about the web, such as *Netscape 6-in-1*).

First, let me qualify this discussion for folks that we are really talking about the *future*; downloading full, commercial-color comics at a reasonable quality over the World Wide Web is not a practical reality for most people at this point. Even among those who are connected to the web, the files involved are so large that it would take hours to get a comic book at a reasonable resolution. Moreover, the computer monitor is, at best, an awkward way of viewing comics pages, particularly ones that were not designed for monitor viewing. The speed situation will, however, be changing quickly, since there are new systems being tested which will get information into your home more quickly. The monitor problem will take a while longer.

In some ways, the concern you raise about the web is not unique. I can think of another medium where, decades ago, most people acquired the technology to be able to take in its offerings without paying its producers one penny. Did this medium collapse as a commercial medium? Quite the opposite. The medium is television, and it keeps growing larger. Television arranged its finances from the very beginning so that it wouldn't depend on income from the viewer.

Is it possible for comics to finance itself like that? Absolutely! With printed comics, about 2/3 of the price of a comic book is distribution costs, the money that goes to the distributor and retailer for getting the comic book to you. A big chunk of the remaining third is printing costs. Very little of the price of a comic book is the cost of writing and drawing it. With distribution over the web, however, the cost of distribution and reproduction of each copy of the comic book becomes just about zero. Suddenly, you get into the range where advertising can pay for the costs.

In fact, because the comics would be free, readership should go up. The more readers, the more the advertisers will pay. Could people still

Here is another gorgeous eyeful from the Spanish cover artist extraordinaire. Just like "Women", this collection came out briefly a few years ago only to be quickly sold out and unavailable since. Sexy, sensuous, horrific fantasy art as done for the covers of Heavy Metal and leading mass market publishers.

reproduce the files and distribute them without getting permission? Sure, but they'd be helping! That's just pass-along readership, which is generally considered an important part of magazine readership. Is it possible that someone would go to the effort of downloading the file, stripping out the ads, and then making it available for others to download? Yes, but how many people are really going to wait until someone does so, then hunt down where it is, rather than just downloading the original in the first place?

And that's not the end of the good news. Currently, most comics that have ever been published are out of print. If I want to get something from 50 years ago, odds are that I'll have a hard time finding it and even a harder time affording it. However, the cost of keeping something "in print" on the web is simply the cost of the disk space, a minor cost, indeed. If this system had been in place from the beginning, I'd be able to read those Walt Kelly *Our Gang*s that I've always been curious about. (And — to anticipate the question "Will the old advertisers still want to pay?" — it's quite easy to include *current* advertisements, whenever someone chooses to download the comic book.)

Is this the only possible course for the future? No, the future always holds some surprises. But if we look at the World Wide Web as a tool rather than a weapon, a lot of possibilities open up.

[How many people will wait until someone copies something and then hunt for it, rather than download the original? Everyone, if the original costs enough to support the creator and the copy is free — which was my point.]

DC's Vertigo line does a beautiful job of allowing talented creators to reinterpret old characters in new ways. However, Gaiman's Sandman doesn't require the destruction of Kirby's Sandman. It is the attempt to reinvent heroes by radically altering their personality, ultimately perverting their history and destroying their future, that is a violation of the public trust.

When are these companies going to recognize that all it takes to revitalize an established character is creativity and talent? Look what Karl Kesel is doing to Daredevil now. No armor, no clones, no killing off of Matt Murdock — just great storytelling in the mythic hero tradition, complete with the reappearance of favorite old villains and even the return of the legendary artist Gene Colan.

Before the current downward trend in the comics industry becomes an uncontrollable spiral into non-existence, the publishers need to realize two essential points:

• Super-heroes are not just for kids — never were, never will be. Publishers need to respect the myth-making tradition that they are a part of and not continue to perpetrate the "planned obsolescence" of the adult audience. Narrowing the audience does no one any good and just sets the industry up for the day when a generation of kids, too busy with their Nintendo 64 and CD-ROMS to have ever bothered with messy paper-based comics, simply ignores comic books to death.

• Publishers may own the intellectual property of the characters, but it is the public that invests those characters with meaning. Therefore, the publishers hold those characters in a quasi-public trust, acting as stewards and caretakers of the universes on which they hold the mortgage. Certainly, characters need to be freshened up, rejuvenated from time to time, but with love and respect and an understanding of history. Change should be based on artistic concerns, not on current hot trends or short-term economic factors.

If editors can resist going for the quick fix to revitalize a sagging title (*i.e.*, bringing in a new team and wiping out the current hero), if writers and artists can be encouraged to be imaginative rather than repetitive, if publishers can understand that there is long-term profit in looking at the long term, perhaps our heroes will survive.

Big if.

Steve Englehart is a superb writer, but he was not the only person producing exciting *Green Lantern* stories during the late '80s. Alan Moore wrote a number of inventive stories about various obscure members of the Corps. His most famous GLC story teamed him with Kevin O'Neil. It was a dark, unsettling "untold" tale about Abin Sur, the man who gave Hal Jordan the ring. It appeared in one of the GL annuals. The Comics Code Authority found O'Neil's art tacitly offensive and, to DC's credit, it just published the book without the seal. I heartily recommend everyone read this.

Speaking of O'Neil, has everyone read the *Bat-Mite: Mitefall* special that he did with Alan Grant? I commend DC for publishing something that so effectively ridicules one of its own storylines. O'Neil is so good at drawing cute little people that I suspect he must have worked on The Smurfs. I would love to see more comics like this.

In interviews, Alan Moore used to talk about this Bizarro World special he and O'Neil would like to do for DC. It took the absurdity of the Bizarros to new extremes: There was a block of concrete called The Solid Zone where criminals were kept. (Bizarro #1 walked up to it and said, "Am you all right in there?" The response was: "We all right.")

The bottle city of Kandor was several times larger than the planet and was on a platform in outer space. Anyway, DC, give Alan Moore a call about doing this. If he won't do it, get Alan Grant to write it and give Moore some story credit. I know the Bizarro World doesn't exist anymore, but make it an Elseworlds. Hey, as a friend suggested, if George Pérez were asked to finish the original Avengers/JLA crossover, it could be published as an Elseworlds. I know they've crossed over since, but everyone still wants to see this — and no one cares that it wouldn't fit current continuity.

In talking to people at the Chicago Comicon last year, the two things I said which got a laugh from everyone was that, if the Comic Book Legal Defense Fund wanted to make money, they

should get Rob Liefeld in the dunk tank (I didn't know they were actually doing it) and my description of Marvel and DC. DC is like several families living in the same apartment building: Everyone gets together for a party every once in a while, but mostly they do their own thing. There is some brilliant stuff and some horrible stuff but there is no consistency across the line.

Marvel's product is much more consistent, but that's its problem. While DC has had some new blood and new ideas in the last 15-20 years to revitalize the company, Marvel has just had fan boy after fan boy in the last decade, and the best they can do is regurgitate old Kirby (or in the case of DeFalco's *Fantastic Four* run, Byrne and Simonson). Whereas Marvel was once the trendsetter, it now imitates DC, though rarely successfully.

Let's get ready to ruuummble! I'm not mentioning any names, because I am not taking any sides. I appreciate comic books for the fun, excitement, and adventure that you will find in most of them. I just can't believe all of the feuding happening in the comics industry. This has been going on for a long time. I thought comic books were supposed to be fun, but you have so many comic-book creators at each other's throats. This is truly a cutthroat industry. What I hate most is when the fans get involved.

That is why I try to follow the characters, more than follow a creator. If the creator does something that you don't like, then it makes the reader prejudiced about his or her characters. Look how many people loved Pee Wee Herman; they loved the character but did not like the actor who portrayed the character.

Why don't we just have a boxing match at every San Diego con? I can see it now. OK, in this corner (using Xs instead of real names), we have X "The Hammer" X, going toe-to-toe against X "Uppercut" X! I think the fans would love to see this. Start a gladiator ring; let the creators go at it. They are always willing to display their hostile emotions against another creator on paper. After a while, it gets ridiculous. If they can't get along, then put boxing gloves on them.

I might be wrong, and correct me if I am, but do novelists argue and bicker the way comics creators do? I don't ever see that in the regular book industry. I don't see Arthur C. Clarke calling Anne Rice names. So why do we have this in the comics industry? C'mon: Fun, fun, fun, we're supposed to have *fun*! This is supposed to be a fun entertainment; stop the damn whining and bickering; it gets sickening after awhile. In the famous words of Rodney King — can't we just all get along?

On a lighter note, I thought the *X-Men-Star Trek* crossover was the crossover of the century. There were good humorous parts in the story, and the way Marvel put the whole story together was incredibly wonderful. I don't think I'll forget the parts of the story in which the name "Dr. McCoy" was yelled out, and both The Beast and Bones both turned around — or when Capt. Kirk was questioning if his ship was punched. There were some good moments. It was a gathering of Trekkers and Marvelites coming together for a well-told tale.

I don't often disagree with Peter David. But regarding his recent *But I Digress* column on super-heroine breast size, I must (*CBG* #1211). At the risk of reopening a generally pointless debate on super-heroine breasts, I offer these comments:

First, David comments that super-heroines are drawn fantastically endowed because the exaggeration keeps them from looking wimpy next to the men. Not a bad argument (though one could question society's shallow perception of the idealized human form — whether male or female), which I might support if he hadn't mentioned Liam Sharp's super-endowed rendition of Betty Banner.

If super-heroines are exaggerated so that they appear the "right size" when standing next to the men, then shouldn't a mere human be realistically portrayed in order to make the superfolk look even bigger? By that reasoning a diminutive Betty Banner with "normal"-sized breasts would make The Hulk look even bigger! If so, then a responsible artist would draw her realistically and an editor and writer should insist on it and not defend the breast size as a mere artistic style choice (as someone did in the *Hulk* letter column).

Second, David says that male characters are also drawn offensively because they are given no genitalia at all. However, his observation ignores the reason that many women find a super-heroine's breast size offensive. Huge breasts on super-heroines can make women feel inferior. Using that standard, why should men be offended by a super-hero's lack of genitalia? After all, even the least-endowed men have more than Superman. We should all be proud. You could even argue that men are drawn without genitalia so that artists and readers can feel sexually superior to characters who are physically superior in every other aspect.

David points out that super-heroines at least have some sexuality (ludicrous as it may be), while men have none. And that is precisely the point — it's sexual. A female's sexual organs are exaggerated because they are drawn by straight men who love to draw sex kittens. Meanwhile, super-heroes have no sexuality because they are drawn by straight men who have no hormonal attachment to the depiction of their male heroes. Artists can deny it if they like, but that doesn't change the fact that their depictions of women have nothing to do with art and everything to do with hormones.

Have you checked art by gay males? In an interview with Alison Bechdel (*Dykes to Watch out For*, a great comic strip) she pointed out that in art by gay males the men almost always have huge genitalia. Why? Because it's sexual. She didn't say, but I bet in gay male art most women are normally endowed, if not downright tiny. DC's *Tempest* is drawn by Phil Jiminez, who says in issue #4 that he's gay, and you will note

From Page 18

that Garth's crotch area bulges (although not excessively so).

At a convention, I once heard David say that he specifically asked an artist to draw a dumpy woman for a sequence. He got back art featuring a beautiful model. The artist's excuse was that he didn't feel like drawing a dumpy woman. That an artist is unwilling to draw realistic women (even when requested to do so) tells me a great deal about the artist. It tells me that the artist is not only unprofessional but he's also emotionally immature. It tells me that his perception of women is a shallow one that grants them sex appeal only if they have huge breasts. Artists can claim it's style, but the only people they're fooling is themselves and like-minded straight males.

And it is a male thing. In general, I don't think lesbian artists draw huge breasts and straight women don't draw huge crotches.

Generally, I find David's reasoning so logical and well-thought-out that his lapses in logic in this instance seem remarkable. I suspect that it's because he once again let his desire to be funny (and he was) overshadow a serious look at the problem. I don't have a problem with that. Being funny is David's job. I just don't want artists latching onto his humor as a serious argument to defend their own lack of artistic discipline.

Larry Marder

My favorite Steve Geppi memory really doesn't have Steve directly in it. It happened Jan. 27, 1995, at the grand opening of the Diamond International Galleries. The invitation said "black tie optional," so the Image contingent (Tony Lobito, Beau Smith, and I) got all duded up in our rented tuxedos and went to the party. Steve and the Diamond organization pulled out all the stops for this gala affair.

It looked like a Hollywood opening from the '30s. There was a bank of searchlights in front of the green glass building that is home to Diamond and Gemstone. Pulling up to the entrance was a long line of stretch-limos. And out of each limo would emerge a gorgeous-looking couple dressed to the nines in formal evening clothes. It seemed as if all of Baltimore and Washington society had turned out for the affair. A throng of reporters and paparazzi bombarded us with questions, as we entered the building.

The gallery was filled with glamorous people all carefully inspecting the original art, paintings, and pristine mint comics on display as if they were Ming vases or the crown jewels of Europe. Anyway, as I looked around the crowded gallery rooms I remember thinking, "This isn't just the opening of a gallery — this is the next step towards the foundation of the Steve Geppi Museum of American Popular Culture." And knowing the love and respect that Steve has for these wonderful things he has collected, I hope that I'm right!

[Larry sent this letter to us in January, when it promptly got buried by a combination of Wisconsin snows and drifts of paper piles in the ***CBG*** *offices. It's never too late, however, for us to provide this sort of anecdote about the world of comics. (Hey, Steve, how* ***about*** *such a museum?)]*

Andrew M. Ford

My comic book *Rib* has been getting a lot of great exposure lately, topped off recently by a full-page article in ***CBG*** #1209. The response to that piece was tremendous, and I just wanted to thank everyone for their interest in *Rib*.

I would also like to thank ***CBG*** for continuing to do as much as it can to support self-published and independent comics. Shortly after that article came out, I worked out a deal to move *Rib* to Caliber Comics. I know that all the coverage I've received in ***CBG*** (due mostly to efforts of Tony Isabella, Maggie Thompson, and Michael Dean) had a lot to do with a company like Caliber taking notice of what I was doing.

I think it's great that a major publication like ***CBG*** is willing to change and evolve with an industry that is so ovbiously moving towards being more than just a home for super-heroes. Thank you so much for all the support and coverage. I look forward to many more issues of interesting, widely diverse news and information.

Donald T. Marshall

The number of independents these days is great for the industry. The quality of the material coming out can do nothing more than make all the creators, writers, and artists strive for an even higher level of excellence. The competition can only deliver the readers and fans exactly what they want: a great product.

Also, the professionals from the small companies are making many personal appearances in an effort to corral their segments of the market, something else the fans enjoy. All I've met have been very personable, though a limited few give the impression they are looking down from the top of the mountain. The Amanda Connors, Jimmy Palmiottis, Joe Quesadas, Billy Tuccis, and David Macks should spread their attitude of fan appreciation to their fellow professionals. Everyone will reap the benefits.

But whatever you folks at the smaller companies do, please, please, please, don't try to bite off more than you can chew. There are some indications that it's starting already. Advance carefully on your crusade, people. There are more like you waiting for a chance to capture the fans. I can't remember the last time I bought a Marvel or DC (other than Vertigo) title, and it wouldn't bother me if I never did again. I'm starting to like getting pampered by the "little guys." I just hope they can continue to take pride in their work and not let their view of the future get blocked by "dead Presidents."

I'm taking the advice from Tom Connolly's letter in ***CBG*** #1214 and passing copies of this letter on to the publishers of the titles I read, just in case they don't read ***CBG***.

[It does seem to me that you may be snubbing a lot of fine work from people who, while they may work at bigger companies, also care very much about the work they produce and do appreciate their fans. One of the neatest things about this field is that there's an incredible variety of work out there that can appeal to an incredible variety of people, if those people will only give it a try.]

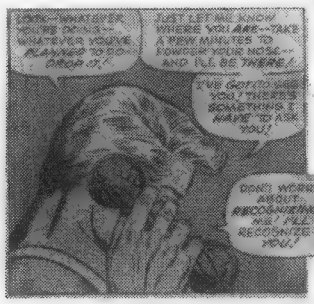
Most comic books are illustrated in a three-stage process: The pages are completely drawn out in pencil, then the lettering is inscribed in ink, then the art is finished in ink. One, two, three. Lately, computer lettering has slightly amended the routine on some books, but it still remains a procedure of three separate, distinct phases, usually involving three craftspersons.

"Mike Royer wore out three or four General Electric irons in the service of the King of Comics."
— Mark Evanier

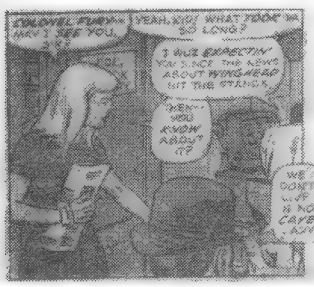
A few columns back, we discussed the fact that comic-book companies often supply drawing paper to their artists. This, we noted, is less due to generosity than to a desire not to have quarrels. The general rule of thumb is as follows:

If the penciller picks out the paper, the inker won't like it, and, if the inker picks out the paper, the penciller won't like it, and, even if the penciller and inker agree on a stock, the letterer won't like it.

I mentioned here weeks ago that, when I worked for Jack Kirby, it took us a while to find a paper stock on which he could draw. The pencils he liked to use did not like the paper that DC supplied — but when we bought a kind that worked for Jack, it presented problems galore for Mike Royer, who inked and lettered the comics. Well, I'd forgotten (but Mike has since reminded me) that even the paper stock we ultimately selected wasn't ideal and, in order to do his best work, Mike found it necessary to iron the pages before inking them.



Whoops. The word balloons appear to have run out of room in these panels from ***Tales of Suspense*** *#95, Jack Kirby's first attempt at drawing on the smaller pages mandated by Marvel.*



You read that right: iron them. As in: He took a plain, old-fashioned iron — the same kind your momma used to press your dungarees — and ran it back and forth over all those *Kamandi* pages.

No, they weren't wrinkled. You don't have to be Bill Nye the Science Guy to figure out the heat did something to the graphite and/or paper, making it more conducive to ink. Mike wore out three or four General Electric irons in the service of the King of Comics.

To ward off squabbles, many companies buy a ton-weight of one kind of paper, imprint it with blue lines to denote the margins, and make everyone draw on it. Yes, it can be more convenient for some artists — the ones who like the paper — but it also makes it easier for an editor to hand a pencil job to any inker. For the same reason, companies usually insist that everyone draw their work the same size. As we will be noting here *ad nauseam,* artists are all different. Some like to work smaller — some, larger.

Some even like to work as small as possible. Alex Toth drew some of his stories for Warren the same size they were printed. Dick Briefer is said to have drawn his *Frankenstein* series close to the published size. John Severin, who now prefers to work as large as possible, did a few of his E.C. stories only slightly larger than they'd appear in the comics. Pat Boyette has done some of his comics close to printed size, as has R. Crumb.

A few artists have also worked smaller for a different reason: In the mid-to-late 1960s, Dell Comics was paying next to zip for art in comic books like *Ghost Stories* and *Outer Limits*. Some of its artists, including Frank Springer and Jack Sparling, didn't figure they should be putting a lot of drawing on pages that paid so poorly. To cut down on the space they had to fill, they adopted a smaller-than-usual size. Not every artist decreases his drawing time working smaller — it takes some longer — but it apparently allowed these guys to give Dell its money's worth and no more.

But these are all special cases. Most original art is drawn notably larger than the size it is printed. Oddly enough, the artist is usually given little or no say as to just how much larger. Some guy with a title like Production Manager decides what size everyone will work at, and that, usually, is that.

•

Over the years, the size of the original art has often had an impact on the design of what was drawn on it. Back in the '40s and '50s, many of Western Publishing's funny-animal comics (Disney, *Looney Tunes*, etc.) were drawn so large that most artists couldn't fit an entire page on their drawing tables. Carl Barks, among others, cut the pages in half and would work on one piece, then the other.

This, of course, made it impossible to do a full-page panel or to have a panel cross the center of the page. Later, Western went down to a more functional size, with an image area around 12 1/2″ by 18 1/2″. (The paper itself was larger to allow for margins. But the art was to those dimensions.)

Until 1967, DC and Marvel artists worked at that size. That was the year one of our great artists, Murphy Anderson, drew a few stories for *The Spectre* and pestered DC into letting him work smaller. He selected 10″ by 15″ as a comfortable size. Since Murphy was doing both pencils and inks, DC Production Manager Sol Harrison acquiesced and OK'd the smaller size, probably after being assured by letterer Gaspar Saladino that he could handle the different scale.

When Anderson's pages were going through the engraving process, someone at the color separator's plant called up DC and said, "You know, we could save you some money if you drew *all* your comics this size." With the smaller size, it was possible to fit four pages under the camera at once, as opposed to two of the old size. It also saved the strippers lots of work.

(Strippers are not what you think. In a printing operation, stripping is the handling of the negatives and the work necessary to get them prepped and positioned to make printing plates.)

So the smaller size saved film and manpower, which meant that it saved money. For the first 40 years of its existence, the comic-book business never passed up an opportunity to save money on printing, no matter how it cheapened the product or inconvenienced the artists.

And many artists *were* inconvenienced. Over the next year or two, the 10″ by 15″ art size became the industry standard. While some artists (Gene Colan, Neal Adams, Joe Kubert) liked it or came to like it, many (Jack Kirby, Steve Ditko, Don Heck) did not. Kirby *really* disliked the change, especially at first. He said, "The first time I finished a page, I picked it up and half the art was on my drawing table."

Most of the Marvels changed within a month or two of the issues dated November 1967. Jack's first work on the small size was the Captain America story in that month's *Tales of Suspense* (#95), and you can see everyone experimenting: The lettering is too big, the inking is too bold, and Jack's panels are filled with head shots and sparse backgrounds. Within a few months, everyone had learned how to accommodate the page proportions, but Jack still longed for the larger canvas.

Many artists did. Some guys who retired at about that time (especially inkers) blamed the smaller size for harming their work. One of them told me that he'd complained to his editor that a page now took him twice as long and the results weren't nearly as good. The editor's response, he claimed, was: "Yeah, but the pages are easier to mail now."

Still, most got used to it. Interestingly, throughout the '70s, Gold Key Comics and Charlton both gave their artists the choice of which size to draw, and most picked the larger. Most of their artists inked their own work, so this caused less ruckus than it might have at DC or Marvel, where most work was then by penciller-inker combos.

•

It changed comics. Whether it was for better or worse is arguable but it certainly changed the manner in which most artists would approach the composition of their pages.

Comic books, as we all know (and will discuss more, next week), started by reprinting newspaper comic strips. The syndicates furnished stats (or, in some cases, the originals) of old strips to the funny-book companies. There, some lowly paid assistant would chop the stats — or originals — up and repaste them into the then-new comic-book-page format.

Syndicated strips are all drawn to the same height: Every panel of *Dick Tracy* had the same vertical measurement, so when someone had to jigsaw *Dick Tracy* into page layouts, there weren't a lot of decisions to make. They could paste them up in three-tier format (three rows of panels across the page) or four-tier format (four rows). Three-tier made the panels larger and made the supply of reprints last longer, so most pages were divvied up that way.

Soon, the then-new comic-book publishers began commissioning new material instead of buying stats from syndicates. There were a couple of reasons for this, probably all of which had to do with money. The syndicates wanted more, wanted to be paid promptly, and were even considering publishing their own comic books. For a publisher like Malcolm Wheeler-Nicholson, who sired the company we now know as DC, it was simpler to hire kids to draw original comics.

Most of the first materials created expressly for comic books aped the newspaper material, often to the *nth* degree. That included the same page layouts for comics.

Comic-book artists in the '40s and '50s didn't deviate much from the basic three-tier format — or four, in some funny-animal comics. The opening (or "splash" panel) would be larger, of course, and, if the scene involved some vertical action or object, they might make one panel span two tiers. Innovative artists — most notably

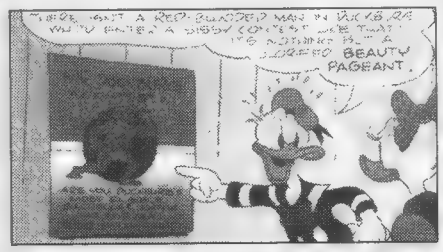
• ***Walt Disney's Comics and Stories*** #611 (Apr 97, $6.95) is a square-bound periodical from The Bruce Hamilton Company using its Gladstone imprint. Speaking of jumping on anywhere, this is the way comics used to be: jam-packed anthologies of all-ages stories, most freestanding, by a variety of writers and artists about a variety of characters. In this case, the Hamilton folks have added detailed credits, when available, to Walt Disney material (much of which was originally released anonymously).

There's a solid mix of classic stories by Carl Barks, other period material by creators including Jack Bradbury, Dale Christensen, and Paul Murry, more recent Duck stuff by Don Rosa, and a terrific new story written by John Lustig and drawn by William Van Horn. It also includes colored reprints of a serial consisting of the most exciting period of the *Mickey Mouse* comic strip, plotted and pencilled by Floyd Gottfredson.



It's the sort of delightful mix kids in the 1940s took for granted they'd get for a dime. $6.95 is a hunk of cash — but so was a dime for us in the 1940s. And this is a delightful package you can read and reread — and savor with any children in your vicinity.

Point of View

From Page 24

Simon and Kirby — might dare a full-page panel or even a double-spread, but it was always as a deviation from the three-tier grid.

In the '60s, more and more, they started to break away from a simple "grid" of panels and to work for more unusual page layouts. I believe that the smaller page size encouraged this.

If you sit down at a drawing board with a page that size, you can see why this was. If you are close enough to a 12 1/2˝ by 18 1/2˝ piece of illustration board to be able to draw on it, you are too close to be able to view the page as a whole. There is, therefore, the tendency to look at one part of the page at a time — to rule the page off into panels and then to design things, panel by panel. You cannot get a good view of the page as a whole.

My friend and collaborator Dan Spiegle came up with a novel way of dealing with this problem, and he's the only artist I've ever heard of doing this. He worked standing up. He would pin the page on an easel and do his inking in a standing position. Thus, he only had to step back to view the page as a whole. And that's how he worked — how he was able to so expertly design a page when he worked on the larger size. He would ink a little, then step back and look at the entire page. Then he'd ink a little more and step back. If he'd been sitting down, he wouldn't have been able to view the page easily in its totality.

Today, when he draws comics, it's on the smaller size, so he can sit down. With the smaller size, you can easily see the entire page, so you naturally tend to design the entire page at once, instead of focusing on panel one, then moving on to panel two. Most artists today design pages broken into individual panels, rather than design individual panels that happen to form a page. (Also, of course, drawing on smaller paper encourages the division of a page into fewer panels.)

There were other reasons for the increase in free-form page layouts, most notably the influence of a number of artists like Neal Adams, Jim Steranko, and Carmine Infantino. But I believe that the mere change in the original art size was highly conducive to getting away from the standard six-square-panels-per-page format. It surely helped nudge a lot of artists to follow the lead of the layout innovators.

It also changed things for inkers. With the smaller size, their linework wasn't being reduced as much for reproduction; therefore, inking had to be a bit more precise, a bit cleaner, and a bit subtler. A rough ink line looks rougher on the smaller size.

Also, the tendency to look at the entire page rather than individual panels has caused inkers to spot their black areas more to balance the design of the entire page. It also became easier to apply Zip-a-Tone — or other "screened" black line patterns — to the pages, and many inkers added these tools to their repertoire.

Today, few artists work larger than 10˝ by 15˝. (Those who draw comics where the image bleeds off the page have to work on larger paper so they can draw into the margins — but the reduction is essentially the same.)

And, today, few artists divide their pages into simple rows of same-height panels. You can decide for yourself if there's a connection.

While you're mulling that one, I'll return to my central thesis, which is that the comic-book industry has too many arbitrary, treat-everyone-the-same ideas about how comics have to be created. Having everyone draw the same size and on the same paper are but two of them. The only advantage to it is that it makes things modular for the editor: He can have one guy pencil a story and then he can give it to any other guy to ink.

I think that's also a very bad idea. Which means it's a very good topic for next week's column.

And another thing: How come my column has to be printed on the same size paper as Tony Isabella's? I'm much larger than he is. By the way, my address is 363 S. Fairfax Ave., #303, Los Angeles, CA 90036.

Not Responsible For Typos

If you can't beat 'em, Amalgam!

All aboard, Amalgamites! Last year, Mighty Amalgam released not one, not two, but a daring dozen new titles — twelve titanic titles, a veritable cornucopia of comic-book creativity. But were you, our loyal readers, satisfied? Did you allow us to rest, we, the army of writers, artists, letterers, colorists, and (dare we forget) editors who slave night and day to bring you, the loyal reader, the adventures of the awesome Amalgam Universe? No!

The fans spoke and Amazing Amalgam heard their persistent — aye, even imperious — pleas! You wanted more — more of the action, adventure, and nerve-tingling excitement that can only be generated here in the Moshpit of Mighty Amalgam. So, enough, already. Hang up the phones. Turn off the modems. Stop with the letters, postcards, and packages of cookies from Mom (well, maybe not those).

We've done what you asked. Here they are — 12 titanic *new* titles from the madmen (and madwomen) at Almighty Amalgam.

By Jeff Lang

OK, so maybe that's not exactly what happened.

But if there *had* been an Amalgam Comics publishing since the early 1940s — an Amalgam Comics helmed by Stalwart Stan Schwartz and edited by the inimitable M.M. Carwald — well, its sales pitch would probably have sounded a lot like that. In a different — in some ways better — universe, such may even now be the case.

Since the Amalgam universe was established as a place in its own right in *DC/Marvel: All Access* #4, the folks at Marvel and DC are going back to it for another round of 12 titles. Why?

The first 12 issues sold well and readers seemed to enjoy them. But what may have been even more effective was that the creators, too, said they'd had a bunch of fun. Everyone who participated before said they wanted to do it again, and creators who hadn't participate in 1996 asked for a shot in 1997.

So, on the week of April 2, no Marvel universe or DC universe titles are scheduled to ship.

Instead, 12 new "first issue"s will ship from Amalgam. Editors on the project said that readers can expect to see a few familiar faces from last year's Amalgam titles, along with a host of new ones.

In the words of M.M. Carwald: "Accelerate!"

Lobo the Duck: Lobo writer Alan Grant has created what may be the strangest — and funniest — Amalgam universe character seen so far.

In *Lobo the Duck* #1, Grant said, "We manage to destroy Manhattan and kill every hero in the Amalgam universe — that's how it *opens*. This was one issue chosen at random in the series, like part four of a six-part story, so obviously by the end of the story everything that's wrong is put right again, but I don't know how it would have been done."

Art on *Lobo the Duck* is by Val Semeiks.

Grant said, "He captures this amalgamation so well. If you love destruction and good cigars, you'll love *Lobo the Duck*."

The Dark Claw Adventures: The star of the hit TV series *Dark Claw: The Animated Series* comes to comics in *The Dark Claw Adventures*. There's an assassin loose in New Gotham and her name is Lady Talia, daughter of Ra's A-Pocalypse. But can Logan bring himself to use his adamantium claws to defend himself against Talia, knowing that he killed her father?

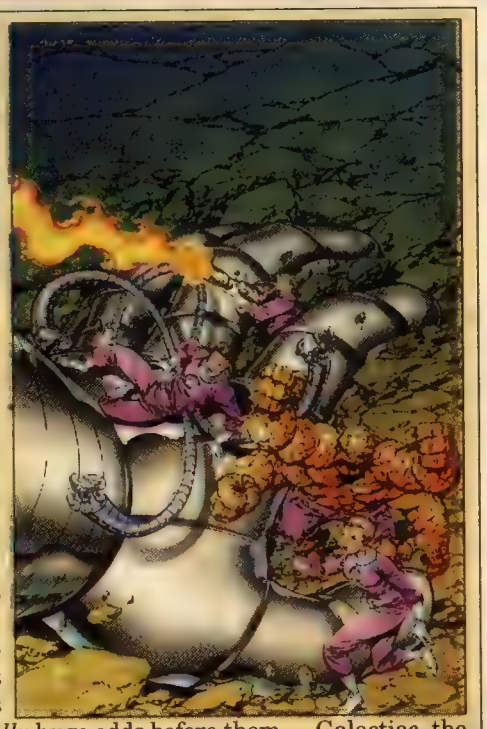
Readers of last year's *Legends of the Dark Claw* will notice some slight differences in the "animated" Dark Claw's costume. Writer-artist Ty Templeton said, "I work in animation and, when I looked at the Dark Claw costume, I said, 'Well, a lot of that is going to go.'"

And, as he does in *The Batman and Robin Adventures*, Templeton took pains to make this a single-issue story. "I read all 12 issues of the first batch and they all seemed to be chapter five of a 12-chapter story — and there's nothing wrong with that — that was the fun of it, but we wanted to do an entire story in 22 pages.

"My favorite part is the middle two pages where Dark Claw goes into The Danger Cave and fights Life Model Decoys of all his villains. It was nothing but a dumb excuse to run nine smooshed villains past the reader, one after another. They kind of did that last year in *Spider-Boy*, and that was my favorite part — the parade of characters. It's literally one panel each — they attack him, he slices them in half, and we move on."

Inks for *The Dark Claw Adventures* are provided by Rick Burchett.

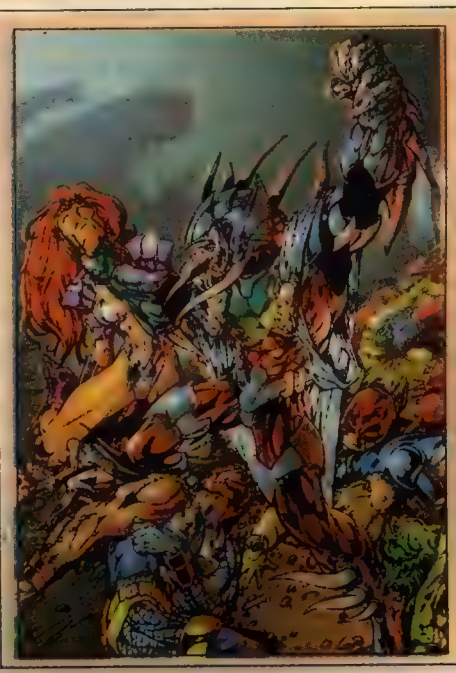
Challengers of the Fantastic: "We set up The Challengers of the Fantastic (Reed 'Prof' Richards, Benjamin 'Rocky' Grimm, Susan 'Ace' Storm, and Johnny 'Red' Storm) last year in *Spider-Boy*," said writer Karl Kesel, "but the implication was that they had existed as a team before. The way we look at it is: They were probably pre-Heroic Age characters who were later eclipsed by people like Dark Claw and Spider-Boy.



"In the first issue of the new 'series,' we explain that they've been brought back together to handle a crisis and that they're back on active duty. It's the beginning of a new era: Silver Age heroes returning."

Unlike the other characters featured in the Amalgam titles, The Challengers of the Fantastic are not super-humans. Kesel said, "They're normal people who go against insurmountable odds and win. I can't think of a more hopeful and positive message to put out there — that normal people can overcome any odds put before them. So, of course, we put *really* huge odds before them — Galactiac, the Devourer of Worlds. There will be lots of action, lots of name-dropping, glimpses into other corners of the Amalgam universe."

Pencils on the issue are provided by Kesel's frequent collaborator Tom Grummett, with inks by Al Vey. Kesel said, "Tom Grummett was the first and only choice for the job and a good thing, too. He would have gone down to New York to kick people out of the way to get it."



Exciting X-Patrol: This Amalgam title continues the adventures of last year's *X-Patrol*.

According to writer Barbara Kesel, "This is something of a reboot — heading off into a different direction. It kind of plays off another part of the mythos of the two source teams while still using the main characters.

"This time we find out more about the background of Niles Cable and the interesting places he's been to before he comes to our time to help our characters — part of his past comes back to meet him."

Elasti-Girl, Shatterstarfire, Ferro Man, Beastling, and Dial H.U.S.K. all return in a tale that Kesel said, "Isn't nearly as reference-saturated as what Karl did with *Spider-Boy*. It's just another cool issue of a fake comic book."

Art is provided by Bryan Hitch.

Bat-Thing: "In the shadow of the River Drive, where the brown water meets the grey edge of the city, and the stink of the Gotham fish market mingles with the downwind traces of the sewage treatment plant, lies a nether-realm of winds, junkies, and urban walking-wounded." With that, writer Larry Hama sets the mood for the Amalgam universe's tale of urban horror.

The Bat-Thing is scientist Kirk Sallis, a geneticist with a terminal disease who made himself the guinea pig for his own experiments. The experiment was, in a sense, a complete success. Sallis didn't die, but was reborn as a high-flying creature of the night who now flies across the city seeking revenge on the motorcycle gang responsible for his condition. This pastiche of '70s terror and '90s urban angst is pencilled by Rodolfo Damaggio and inked by Bill Sienkiewicz.

Super-Soldier: Man of War: Although the return of Super-Soldier is being billed as the return of the original team, when asked, writer Mark Waid said that he had comparatively little to do with Super-Soldier's second appearance. "I've been getting too much credit for this one," he said. "*Man of War* is Dave Gibbons' story. I just kicked in a few ideas."

And it was a story that Gibbons said he hadn't initially been certain should be told again. "I thought that the Amalgam comics might be like a joke that can only be told once, but I think the second time around we've all been able to come up with something that makes it all new again. With the first *Super-Soldier*, it was very contemporary — on the Superman end of the spectrum, if you like. This time, we go to the Captain America pole of it. For me, Captain America always worked best in World War II when he had a really clear, undeniably bad adversary to go up against."

To emulate the early 1960s art style, which Gibbons described as, "the six-panel grid, very straightforward storytelling, and nice, flat coloring," he re-read *Sgt. Fury and His Howling Commandos* #12, featuring the first meeting between Captain America and Sgt. Fury and was impressed by the story's density. "Stan and Jack managed to get a lot into that one. There's even a Nazi plot to tunnel under the English Channel. It was one of those things that Kirby managed to make believable, just tossed off in a page or two. Hopefully, it will bring a smile to those who loved that kind of story." Gibbons' pencils are inked by Jimmy Palmiotti.

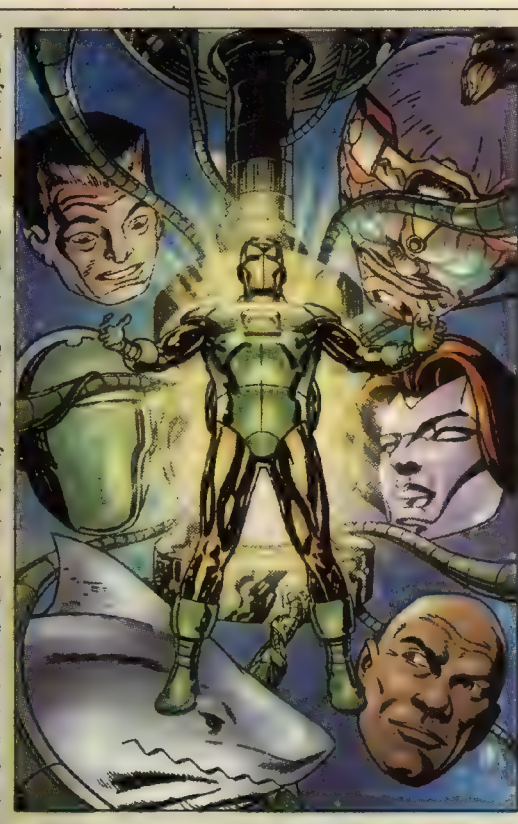
Thorion of the New Asgods: Keith Giffen said his motivations for doing an Amalgam title were simple. "It was just a chance to do a Kirby riff — you know, big, explosive panels with lots of cosmic nonsense going on."

He said his other motivation was the artist who agreed to work on it with him: John Romita Jr. "I have a diminishing list of unfulfilled ambitions in comics, and one of them was doing something anything with J.R. Jr., because I love his stuff. Well, I can check that one off now."

Giffen added that his starting point for the story was the end of everything. "I started off with Ragnarok and worked my way up. I think anything like that needs to have that classic Kirby line in there: 'There came a time when the old gods died.' I just changed the word 'died' to 'changed.' A pact was struck between Odin and The Source in order to save as much from Ragnarok as possible. The Source comes in and everything is transformed and then I just combined things."

Giffen added that several of the characters seen in *Thorion* were introduced in last year's *Bullets and Bracelets*, including Thanoseid, Lord of Apokolips. "It's a nice, straightforward story with as much Amalgam mythology in there as I could manage without its turning into a 'and then this happened, and then that happened' story. It was an interesting exercise."

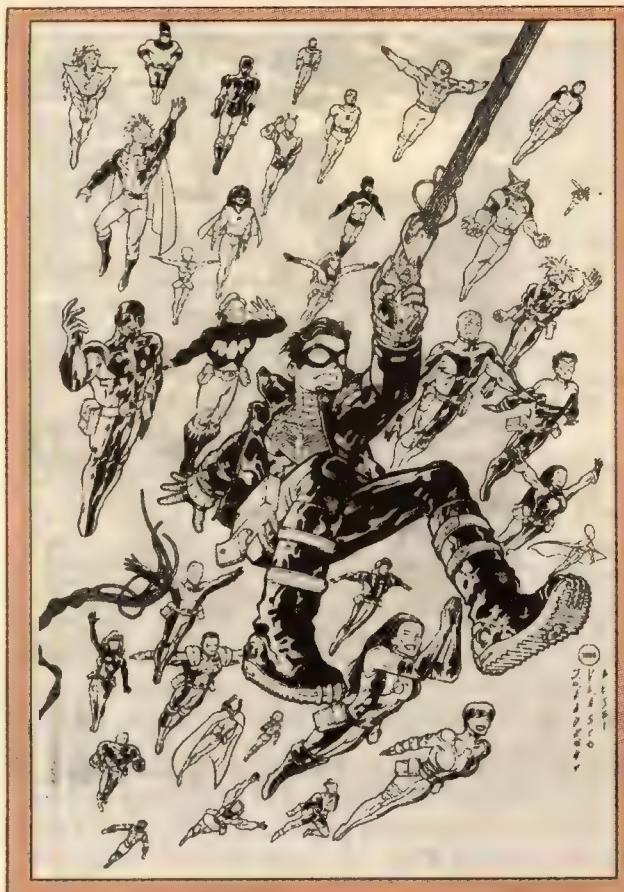
Iron Lantern: Series creator Kurt Busiek said, "*Iron Lantern* is the secret super-hero identity of Hal Stark, a brilliant engineer and owner of the high-tech Stark Aircraft company. He was doing some engineering work on a flightless pilot trainer when the trainer suddenly took off with him in it and drew him to the site of a crashed alien spaceship.



"However, before he was able to land, the mysterious green energy that was drawing him to the ship abruptly cut off, and he crashed. Critically wounded, with shards of metal thrust through his chest endangering his heart, he dragged himself to the alien spacecraft. There he found the corpse of an alien named Rhomann Sur, who had apparently died before completing whatever plans he had had for Hal. Fortunately, Hal was able to build himself a life-sustaining armor from the alien wreckage — powered by a lantern-like battery he found — and since then he's fought against evil and attempted to unravel the mysteries of his origin as Iron Lantern."

Busiek added that every hero needs both his friends and his enemies, and *Iron Lantern* promises to deliver both in spades. "Naturally, at Stark Aircraft Hal's surrounded by a variety of supporting characters, including the Eskimo mechanic and ex-boxer Happy Kalmaku and the fiery-tempered test-pilot Pepper Ferris. And there are plenty of nemeses, including Pepper's alternate identity as Madame Sapphire, the high-tech villains H.E.C.T.O.R. and the Weaponers of A.I.M., and, looming behind it all, the enigmatic Oa the Living Planet."

Busiek is joined on *Iron Lantern* by artist Paul Smith, who, Busiek said "has very strong ideas on how certain characters should be done. So when *Iron Lantern* came up, I did the thing I seem to do more than other people — I called and asked him."



Spider-Boy Team-Up: Spider-Boy's co-creator Karl Kesel said that *Spider-Boy Team-Up* "features Spider-Boy and the Legion of Galactic Guardians 2099. It's a huge time-travel story where Spider-Boy doesn't only meet the Legion of Galactic Guardians, but all the different rebooted versions of them. It's the Legion times three or four with Spider-Boy just being pinballed through time."

Kesel said he had had trepidations about going back to the same Spider-Boy stewpot for another helping, and so was grateful for the *Team-Up* angle. Kesel said, "I really felt, 'Jeez, it came together so well, do I even want to go back there? Maybe I should just leave it as a perfect moment.' I have to say that, when it came time to sit down and script the pages, I had as much fun this time as the first time around."

He continued that some of his anxieties had been allayed by the art of Jo Landronn. Kesel said, "He is really going to get a lot of attention. His stuff is this weird combination of Jack Kirby characters in a Geof Darrow world. He draws these intricate, detailed, rivet-neon-covered backgrounds with these wild action-oriented characters with square fingers and Jack Kirby squiggles. It's amazing stuff. He's got an amazing sense of design."

JLX Unleashed: This Amalgam title is a spin-off from last year's *JLX*, the creation of Mark Waid, Gerard Jones, and Howard Porter. Writer Christopher Priest said that he had felt a little out of his depth when Editor Ruben Diaz had approached him with the assignment. Priest said, "He brought me in and I said, 'OK, talk to me like I'm a 4 year-old. Tell me who these guys are and what's going on.' " He added that the story in *JLX Unleashed* is two or three years down the road, continuity-wise, and the situation for the JLX (a metamutant super-team) has evolved.

"In the original *JLX*, they were not a terribly public group and, by the end of the issue, they decided they were going to fight evil mutants. In this series, we see the consequences of them becoming a public group. There's been a big witchhunt — the Armageddon Agenda — and the Sentinels have busted up a bunch of mutants, some are dead, some are in jail — it's a pretty big mess. But then a much bigger threat appears and everyone is forced to turn to these people whom they've imprisoned and burned."

Though Priest said he'd enjoyed himself, he readily admitted that the writing for Amalgam was demanding. "Writing my monthlies is a lot easier than jumping into this thing. Remember *JLX* is a team title and Ruben wanted to have a bunch of villains running around — thank you so much, Ruben — so this thing was a nightmare on wheels. It's not that it wasn't fun, but it was a lot of work."

Generation Hex: Readers of this title will journey back to the Wild West days of the Amalgam universe to follow the adventures of the very first metamutant outlaw band. Brought together by disfigured renegade Jono Hex, Generation Hex includes Skinhunter, Madame Banshee, The Twins Trigger, and the mysterious Retribution.

Writer Peter Milligan said, "The Marvel mutant characters are obviously more familiar than the DC Western heroes, but we came up with some interesting mixtures. The main character — Hex — grew up mean, grew up fast, and is out for retribution against the people who did his family wrong. It's that kind of a story. Then there's Random Thunder, a kid who provokes claps of thunder with his adolescent mood swings."

Like many Amalgam creators, Milligan said he had approached the project as a lark but, when he was finished, realized he'd completed a story he was proud to call his own. "It was quite appealing — the notion of writing a story that you just popped into, then left without too much concern where you were going to take them in the future. Because it is a goof and people are relaxed about it, the creators have had a lot of fun and good stuff is produced."

Generation Hex has art by Adam Pollina and Mark Morales.

Magnetic Men Featuring Magneto: It's ostensibly a follow-up to last year's *Magneto and The Magnetic Men*, but, said writer Tom Peyer, "It's a whole new thing. Everything you thought you knew about Magneto and The Magnetic Men is wrong.

"The original idea by Gerry Jones and Mark Waid was that Magneto built The Magnetic Men to replace his mutant friends who were killed. He built robots because he realized he could never endanger mutants again. If he was going to fight this war, he needed to have cannon fodder."

As the story opens, the Magnetic Men have become sentient, so, Peyer added, "He can't even risk *their* lives. He breaks up The Magnetic Men and sends them off into the world with new identities. This being a comic book, that lasts for about two pages before they're attacked."

Peyer said his attitude towards the story was, essentially, to do "a slam-fest with heart. Picture an extremely huge, aggressive, crazed individual coming at you with this little tear coming out of his eye. That's what I like to think of this comic book as. It's kind of a shame that Magneto is in this issue because if he weren't there would be no humans in it at all. We're trying to keep Magneto's participation down so we can have more freaks, goons, robots, and monsters fighting."

Barry Kitson and Dan Panosian provide the art. Peyer said, "I know this is a cliché, but I really mean it this time — Barry really outdid himself. He did an amazing job."

Well, I'll be super-amalgamated (again)!

"You probably didn't realize it, but every DC universe comic book these days takes place in an amalgamated universe."
— Jack Abramowitz

By Jack Abramowitz

The Amalgam universe: a blending of two comics universes into a cohesive single unit. Marvel and DC surprised readers when they originally unveiled this concept. It was so incredible, the readers asked, why hadn't anybody thought of it before?

Actually, somebody *had* thought of it before. *Several* somebodies, in fact. Not all of them involved the "smooshing" effect of combining characters, but many of these prior amalgams *did* alter the histories of the characters involved.

In truth, any time characters from two clearly distinct universes cross over without the benefit of some form of trans-dimensional travel, it is an amalgam universe, albeit "smoosh-less." Youngblood met X-Force by traveling interdimensionally; the adventure may, therefore, fit both titles' regular continuities. When Team 7 met Team X, however, both teams were apparently on their home world; it's an amalgam.

Superman and The Silver Surfer crossed universes to team up; it's not an amalgam, because they clearly maintain separate realities. But when Batman drove from Gotham City to New York to meet Daredevil, it was an amalgam since he presumably drove within one universe. Got it? Good.

These types of crossovers have become exceedingly abundant and we will not concern ourselves with them right now. Instead, let us examine worlds that were separate but became artificially merged to create new realities, not unlike the Amalgam (with a capital "A") universe.

Probably the first intercompany merged world created was the Image-Valiant amalgam of *Deathmate*. This reality came into being when, in the year 2062, Solar (of the Valiant universe) flew to Unreality where he encountered Void (of the Image universe). When these two energy beings kissed, their universes merged. Histories were changed: The Unity event never occurred, causing Magnus to be born and raised in our time rather than the 40th century. Alliances were changed: Valiant's Bloodshot, for example, was a member of Image's Youngblood (Youngbloodshot?). And there was a small degree of "smooshing" going on: H.A.R.D. Corps + WildC.A.T.S = H.A.R.D.C.A.T.S.

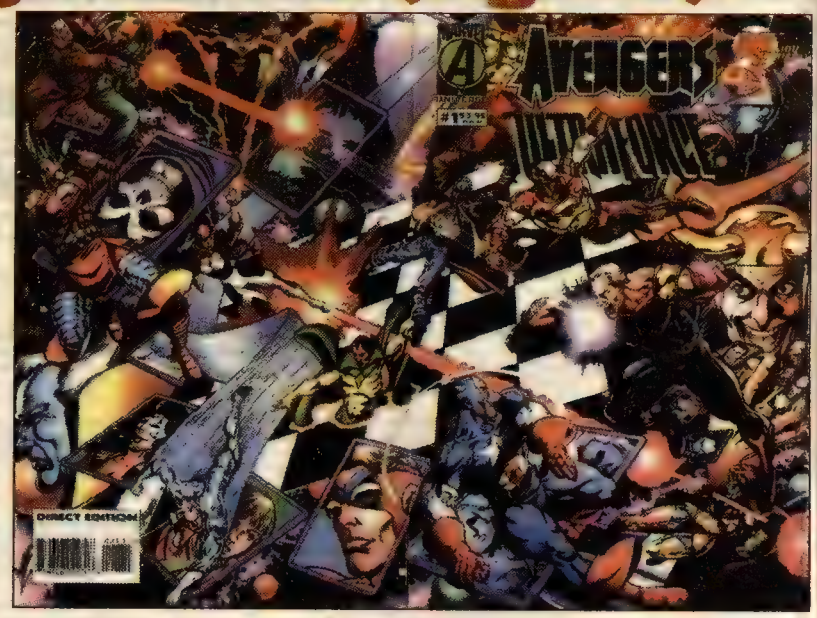
"Feh," I hear you say, "*Deathmate* was nothing. Image wasn't that big yet and we all know what happened to Valiant. Give me an amalgam (with a lower-case 'a') using one of the Big Two. *Then* I'll be impressed."

All right, you cynic, I'll grant you that *Deathmate* shipped late, lost a lot of fan interest, and is not particularly noteworthy except for *Deathmate Black*, the first appearance of Gen[13]. But there was an amalgam involving one of the Big Two. And it was Marvel.

Before Marvel completely absorbed Malibu's Ultraverse, these two universes crossed several times. Loki and The Black Knight were of particular prominence in the Ultraverse. Then came *Avengers/UltraForce*, in which the heroes of two universes were pitted against each other. In the second installment, *UltraForce/Avengers*, their universes were merged. (Hmmm, that sounds almost exactly like *Marvel vs. DC*, right down to the changes in top billing.)

Once again histories were changed (for example, Giant-Man was killed during The Avengers' origin), as were alliances (Prototype for Iron Man in The Avengers).

There was also a fair amount of "smooshing" going on. The "Hulk" was an amalgam of Marvel's Hulk and Malibu's Ghoul. A statue of "Power Man" (page 9, fourth panel, in gray knockout, but it was there) was clearly Luke Cage with the power of Prime. And the FF's tough-talking, cigar-chomping powerhouse was none other than — Mantra?



Of course it all got straightened out, and soon the Marvel universe and the Utraverse were separate again, although spending way too much time together.

DC also had an amalgam prior to its merger with Marvel. You probably didn't realize it, but every DC universe comic book these days takes place in an amalgamated universe.

It happened in *Crisis on Infinite Earths*. The last five Earths left alive were Earths One, Two, S, X, and the never-before-seen Earth-Four.

Earth-Two, you see, was where DC's Golden Age characters lived. Earth-One was home to their Silver Age revamps. Earth-S was home to acquired Fawcett properties (The Marvel Family, Spy Smasher, *et al.*). Acquired Quality characters (The Ray, Phantom Lady, Black Condor, Uncle Sam, *et al.*) all lived on Earth-X. And Earth-Four was home to the Charlton characters (Captain Atom, Blue Beetle, The Question, and so forth).

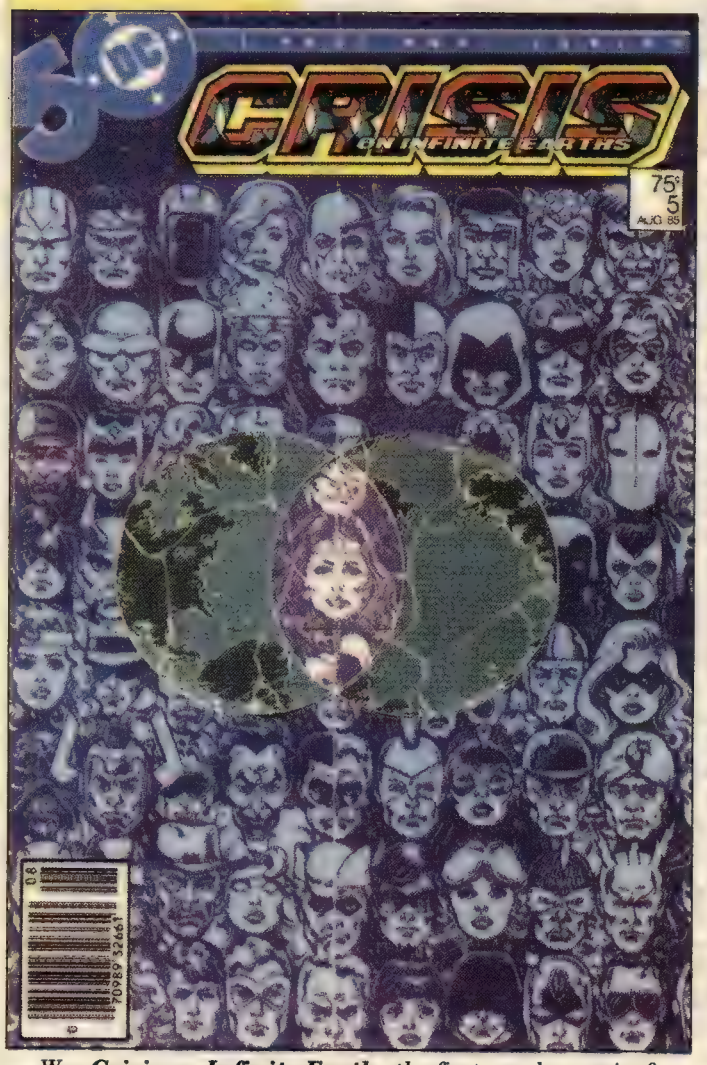
To save these five universes, The Monitor "smooshed" them together. Unlike every other amalgam before or since, everybody was cool with it and they left it that way. Now all the characters from four different comics companies interact on a daily basis. The Human Bomb, Ibis the Invincible, Judomaster, and Batman can hang out after a hard day of beating bad guys' heads in, and nobody has to change universes at Penn Station.

Of course, some rewriting of history had to be done to resolve the existence of continuity-difficult characters left by the duplication of some Earth-One and -Two heroes. For example, Fury's mother wasn't the Golden Age Wonder Woman any more, because there wasn't one. Instead, she was the daughter of the previously unheard-of (because she hadn't existed) Golden Age Fury. Similar changes were made to allow Power Girl and The Huntress to exist or to fill vacancies in The All-Star Squadron left by heroes who now never existed.

While not so uncommon a sight to us, Superman teaming with Captain Marvel or Batman meeting The Question were once as unlikely as anything *Marvel vs. DC* had to offer. Now they're super-amalgamated.

A strange type of reverse amalgam effect happened in Image's *Shattered Image* mini-series in which the Image universe was deconstructed into smaller universes representing its individual studios (WildStorm universe, Extreme universe, *etc.*). The intent seemed to have been to separate the Top Cow characters from Image but, art imitating life, they came back. The plot was partially successful, however, as Image characters such as Spawn and The Savage Dragon now all stand around scratching their heads saying, "Supreme? Supreme who?"

Amalgam universes came and went long before the Amalgam of Marvel and DC. And they will continue to appear, with and without "smooshing." In the words of Cyblade, taken from *Shi/Cyblade: The Battle for Independents*, "Ana, I'm beginning to think that we're from entirely different realities that intersected for a moment — and that now we're in a place that's different from either."



*Was **Crisis on Infinite Earths** the first amalgamation?*

'All-Star Squadron': The perfect cross-over

By James Cangialosi

Comics company cross-overs are occurring more and more frequently these days. The publication of the Amalgam comics by DC and Marvel, the upcoming DC/Image cross-overs, and the Batman/Captain America team-up have helped to establish the potential that exists when cross-company interaction occurs.

These cross-overs are great fun, but it would have been great if similar types of cross-overs had taken place during the early eras of comics. In the 1940s, it would have been any fan's dream come true to have had Superman meet Captain Marvel or have seen Batman appear in the same story as Plastic Man. Unfortunately, it took decades before Golden Age fans could see their dream come true. The publication of *All-Star Squadron* by DC during the 1980s may be the only cross-over that many fans don't realize ever occurred.

All-Star Squadron not only had DC's original Golden Age characters in it, but also showed off characters that were at one time either owned by Quality or Fawcett. DC eventually purchased the rights to those companies' characters, but many of them remained unused for decades until *All-Star Squadron* hit the stands. What fans of Golden Age characters couldn't find in the Golden Age they could find in this title.

The premise behind *All-Star Squadron* was simple. During World War II President Roosevelt made a call to arms for all costumed characters to join forces as a single unit in order to defend the homefront from any Axis force or other threat that might try to undermine America's position in the war. This team not only included the members of The Justice Society of America, but also such lesser-known heroes as Liberty Belle, Johnny Quick, Phantom Lady, Robotman, Tarantula, and The Shining Knight. Characters who played second fiddle to Superman, Batman, and Wonder Woman in comics during the '40s were given central roles in *All-Star Squadron*. For example, Quality Comics characters Plastic Man and Phantom Lady had central roles in the first storyline.

The series was written by Roy Thomas, who shed new light on classic characters. No longer were they considered second stringers or washed-up. Instead, they made an impression on many fans who had never encountered them before. Thomas gave new twists to some heroes, expanded many of their origins, and helped to show the potential that had been locked up inside these characters. Fans began to write to ask when their favorite Golden Age heroes would appear.

Creators who worked on this series in addition to Thomas included Jerry Ordway, Joe Kubert, Rich Buckler, Rick Hoberg, Mike Machlan, and Todd McFarlane. The entire All-Star Squadron appeared in issues #31-37 of the series, and fans were reacquainted with the assorted heroes of Quality Comics and Fawcett's Marvel Family, the latter of whom made an unplanned visit to Earth-Two.

All-Star Squadron #31, "Uncle Sam Wants You," was a virtual Who's Who of Golden Age heroes — including TNT and Dan the Dynamite, The Ray, The Red Bee, The Human Bomb, Doll Man, Midnight, Mr. America, Manhunter (DC's version), Manhunter (Quality's version), Black Condor, Zatara the Magician, and Sargon the Sorcerer. The story arc (which ran through issue #35) also presented the origin of The Freedom Fighters, a super group of former Quality heroes that had been introduced in issues #107 and 108 of *Justice League of America*. The storyline also explained what Hourman had been up to since he mysteriously left The JSA during the early 1940s.

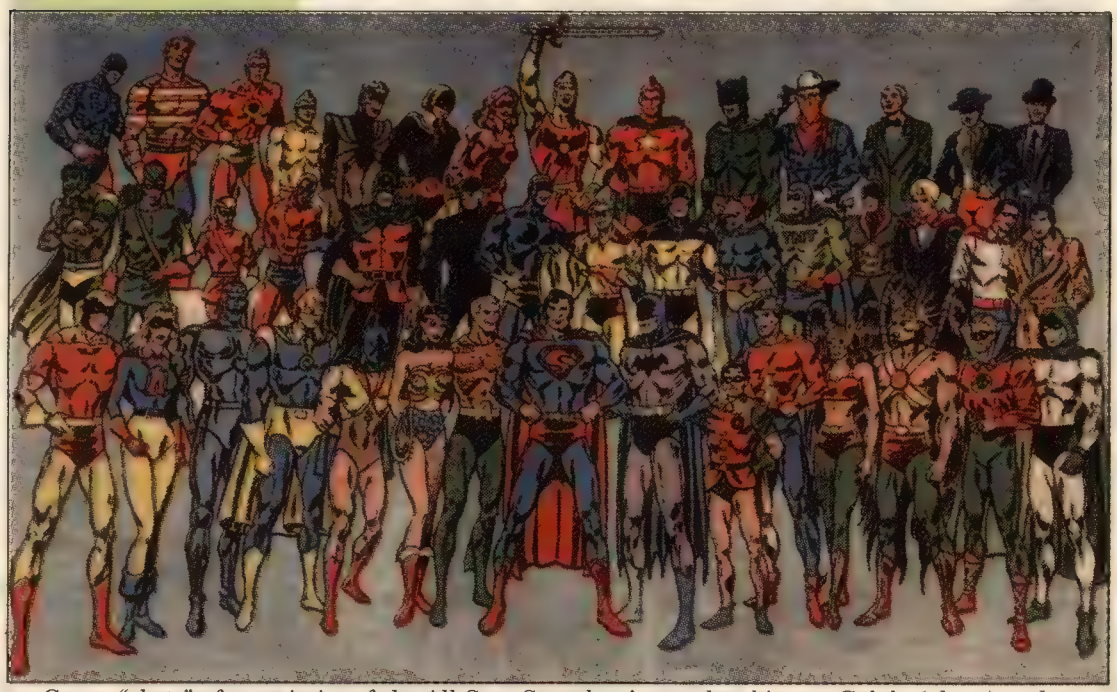
Batman, Superman, Flash, Green Lantern, Wonder Woman, Hawkman, and Plastic Man teamed up in issues #36 and 37 of *All-Star Squadron* to fight a mind-controlled Captain Marvel. The premise of "Thunder over London" is that he has been transported from his own Earth and into the clutches of Adolf Hitler and his Nazi regime on Earth-Two.

One of Hitler's scientists develops a device that separates Captain Marvel from Billy Batson and enables Hitler to gain control of the super-hero through a mystical artifact called The Spear of Destiny. Captain Marvel Jr. and Mary Marvel come to Earth-Two in issue #37 to help the heroes save a captured Billy Batson and return Captain Marvel to normal.

Before the publication of those issues of *All-Star Squadron,* The Marvel Family, along with Bulletman, Bulletgirl, Spy Smasher, Ibis the Invincible, Mr. Scarlet and Pinky, appeared in *Justice League of America* #135-137.

After these cross-overs, All-Star Squadron's interaction with the other Earths of the DC universe ceased until *All-Star Squadron* #50, a Crisis on Infinite Earths cross-over. During the course of the extra-long story, a number of heroes were sent to various Earths, including the Quality heroes to Earth-X, Steel the Indestructible Man to Earth-One, and Captain Marvel arch-villain Mr. Mind from Earth-S to Earth-Two.

Thomas wrote in a later issue's letters column that this "shunting" of heroes to the other Earths was his attempt to merge the *All-Star Squadron* storyline with the then-planned ending of *Crisis on Infinite Earths*, an ending which was later scrapped, forcing Thomas to write another story in which the events of the Crisis caught up with the All-Stars in 1942, a story which appeared in *All-Star Squadron* #60. With the elimination of the Golden Age Superman, Batman and Robin, and Wonder Woman from DC continuity during the events of *Crisis*, Thomas speculated that there was a bunch of "heroic energy" floating around and he used that "energy" to create "replacements" for the missing heroes. Arn "Iron" Monroe, the Golden Age Fury, and Flying Fox were three new characters who made their first appearance in *Young All-Stars* #1, Thomas' follow-up series to *All-Star Squadron*. While a number of DC's Golden Age heroes made appearances in this series, the cameos were downplayed in favor of spotlighting the interaction among the young team members. Additionally, however, Thomas brought in characters and references from other works, including Frankenstein's monster, Philip Wylie's Gladiator, and Edgar Allan Poe's *The Narrative of A. Gordon Pym.*



Group "shots" of a majority of the All-Star Squadron's membership pre- ***Crisis*** *(above) and post-* ***Crisis*** *(below) show the changes wrought by the event. How many characters can you name?*

A minor Variation

by Kim Yale's Husband

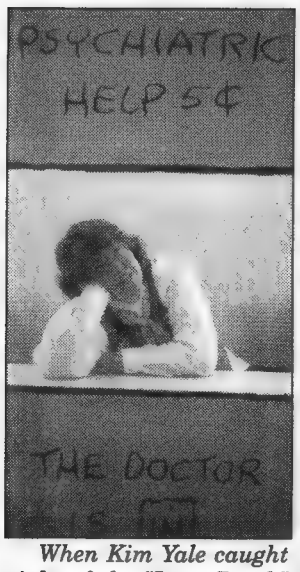
For about the past year or so, Kim Yale has been sharing with you in this space her thoughts and experiences as she battled breast cancer. It is my job now to finish that narrative for her.

"I am as certain as I can be of anything on this Earth that she was going somewhere, that she was reaching up to someone or something, and that she was, and is, at peace."
— John Ostrander

Kim died March 7, at home, at 6:10 in the morning. The day was extremely bright and clear and the sun came up as a big red ball; the room in which Kim rested was literally filled with a red-gold light. We had some music playing softly, one of her favorite movie soundtracks — *Forrest Gump*. In some of the piano music she said she could see Sweetie, our French bulldog who died the previous year. In that same passage of music I always saw — always will see — Kim.

Dying, as Kim's and my friend Mary Mitchell observed, is as difficult and painful as giving birth; Kim's lungs all that night had been gradually filling with fluid and she fought for breath with the same tenacity with which she always fought for what she wanted.

In the end, Kim took a deep breath and her eyes brimmed with tears. One tear fell. She then smiled slightly and her hands reached up. Another tear fell but the smile stayed and then she let go as the soundtrack ended. If I'd seen it in a movie I would've dismissed it as melodramatic and overproduced but, in reality, it was incredibly beautiful. I am as certain as I can be of anything on this Earth that she was going somewhere, that she was reaching up to someone or something, and that she was, and is, at peace.



When Kim Yale caught sight of the "Lucy Booth" at an open house at the Cartoon Art Museum in San Francisco, she rushed to pose appropriately for a photo by Maggie Thompson.

Kimberly underwent radiation therapy focused on the brain stem but, as the year declined further, so did she. She was nauseated and sick a great deal of the time and, the day after Thanksgiving, she entered the hospital again. She had been in and out of the hospital so often that she was well known on the cancer floor. The doctors finally figured out that a mass, probably a cancer, near her bile duct was pressing down where her stomach met the intestine. The mass was considered unreachable and Kim underwent stomach surgery to reroute the intestine to a new exit. Recovery was slow and difficult and she didn't get out of the hospital to go home until the day before New Year's Eve.

She was starting to have trouble walking and we couldn't got her upstairs to her own bed. A hospital bed was rented for the living room downstairs. Gradually, during the month of January, she lost the ability to walk or even stand — a grievous loss for someone who had always danced with such wild abandon as Kim had.

In January, Kim underwent chemotherapy administered directly to the spine via spinal infusion once a week for three weeks. A spinal infusion is the reverse of a spinal tap but the procedure is the same; remembering how one of the drummers in the movie *This is Spinal Tap* died, Kim hoped it would cause the cancer cells in her spine to spontaneously combust. The fact is that it didn't and, in late January, Kim was given the grim prognosis by her oncologist: She was now considered to be a terminal case. Her treatment would now be palliative care, to keep her out of pain. The doctor hoped Kim would be here for our 10th wedding anniversary in June but left little hope that she would see Christmas.

As it turned out, the doctor was overly optimistic. Her decline came on rapidly. One week before she died, Kim was experiencing muscle spasms all over her body and each spasm brought pain that went off the Richter scale. The onset was brutally abrupt and we spent most of the day trying to bring it under control. By the evening and the arrival of the hospice nurse, it became apparent that Kim would have to go into the hospital at least long enough to get a morphine drip started and bring the pain back under control.

Kim had told me that she didn't want to die alone and she didn't want to die in the hospital but she accepted the return as necessary. However, as I said before, she had grown to know the cancer floor there very well and, as she was wheeled into her room she muttered, "Uh-oh, I know what this room is." It wasn't until later that I pieced it together and realized what Kim already knew: This was the room they generally reserved for patients who were going to die.

Friends and family flocked to see Kim. As the weekend progressed and the morphine intake was increased, Kim's thoughts were split more and more between worlds. Some of what she said and did didn't seem to relate to our world; other times, she knew exactly where she was and who was with her. She slept more and more, Frequently, she seemed agitated and picked at her covers or clothes or even tried pulling the morphine drip out. Finally, I understood what she was trying to convey: Kim did not want to die in that hospital room; she wanted to go home.

At that point, Kim was on the critical list and the doctors strongly argued against moving her. It was felt she might die in transit or that the pain of moving her would cause indescribable agony. I had promised Kim she would die at home but now I had to balance my word against the doctors' concerns.

Several factors played upon my final decision. One man, a pastor of a local church who had come to visit, asked me if I thought that Kim couldn't stand the pain of being moved home or that I wouldn't be able to stand Kim's pain. It was also pointed out to me that, if Kim died going home, she would still have been going home; she would not have died in the hospital.

Those who know Kim know that she regarded herself as a warrior and I understood at last that she was in a final battle — not so much with cancer or even death as with that room. I couldn't save her from cancer but I could rescue her from that room. So that's what we did.

As it turned out, the trip home caused very little pain and, while she no longer woke up, Kim knew she was home. She was far more peaceful and quiet once we got her there. As I understand it, the hearing can remain acute in the dying until the end and it was so much quieter in our house than in the hospital. She could still squeeze our hands and communicate with us that way.

As Kim's body failed her, her spirit came more and more clearly in focus. More than anything else, Kim brought love and life and exuberance with her and brought it out in other people, as well. That was her great gift. She felt things so deeply and acted so passionately, so compassionately.

I don't say she lost her battle with cancer; she won it the only way left to her. She abandoned the body that no longer served her and she went elsewhere, a being of light and energy.

That is how Kim died but it is not the full story. To try to convey that requires a series of smaller stories.

If anyone had told me beforehand that the richest, most extraordinary days of my life would be in that week as my wife lay dying, I think I would have done them bodily harm, yet that is precisely and literally true. They have been the most intense, most passionately alive days I have ever known, filled with grief — yes — but also with love, with laughter, with unexpected joy. It was like an Amazonian jungle, with death and life mingled in near-incoherent profusion, every emotion a violent color, everything felt with a hothouse intensity. It was so ... Kimberly.

Since Kim was diagnosed with cancer in September 1995, my role was to be her major supporter and, ultimately, primary caregiver. The true nature of my function can best be shown by the following story.

Kim spent most of December in the hospital due to stomach surgery for a problem related to the metastatic breast cancer that ultimately killed her. She really wanted to get to Christmas Eve church services, however, and — since she was mending — the doctors agreed to write a pass letting her slip out for several hours.

The Church of the Redeemer in Morristown, which we attend, holds its Christmas Eve services around 8 p.m. to make it easier for little children and the elderly to attend. The pastor, the Reverend (actually the slightly IrReverend, as he puts it) Phillip Dana Wilson and the church did everything they could to help us. We were allowed to put a folding cot to one side for Kim to lie on, there was a screen in case she was nauseated, there were two members of the church who had been trained nurses on hand to attend her so I had only to sit there and be part of the service.

The plan was for me to drive Kim to the church from the hospital, park in the driveway by the side of the church, and then, while I left Kim in the car and left the car running to keep her warm, I'd get a wheelchair and bring it down to the car. Kim would get into it (since she was somewhat unsteady on her feet at this point from having lain in a hospital bed most of the month), and I would wheel her into the church.

Most of it went according to plan. A soft warm drizzle was failing that night as I got the wheelchair into place. Kim got out of the car as I stood behind the wheelchair, a tad nervous, waiting, hoping she was OK. Kim stood there, looking up to the sky, and then took off her floppy black hat and let the rain run over her bald head (a product of the radiation therapy a month before). And then she took off walking up the ramp without me.

I gasped, "Uh, Kim? Kim!" I called after her and then started chasing after her with the wheelchair. Halfway up the ramp I realized I had left the car running and the lights on and the doors open, so I ran back down the ramp, with the wheelchair, and secured the car and then went back up the ramp, still pursuing Kim with the wheelchair, still calling after her.

Kim had already made it to the back of the church where she was greeted by the IrReverend Wilson.

A Minor Variation

From Page 66

"Where's John?" he asked, looking around. Kim, without looking behind, gestured back that way with an airy hand and said, "Oh, he's back there somewhere." She then took his arm as he escorted her to her place up in front and to the side of the church. I trailed along behind them.

I think that image pretty well defines my function in this story: chasing Kim with wheelchairs, trying to keep up with her, while she went grandly forward.

The Reverend Wilson told us later that Kim's being there really made Christmas for him. For many people, Christmas and Easter are the only times they go to church and even then it seems something like a nuisance. There was Kim, coming from the hospital, leading by example. Kim, of course, was oblivious to making a statement; she just really wanted to go to church that night.

Kim often didn't understand the fuss, She got afraid a lot and I would hold her and she would cry a little. She couldn't understand why others thought she was brave. "I don't feel very brave," she would say. I told her that courage wasn't a feeling; it was what you did despite how you felt. And Kim was very brave.

Something I learned in these past months and especially the final weeks of Kim's life: the kindness and goodness and generosity that still exists within people. I have always believed in it, but to have so much evidence of it, great and small, to be the recipient of those kindnesses, is almost overwhelming, It is a testimony of the love that people have for Kim, of the love she herself had and engendered.

Having received so many kindnesses, I hesitate to name any people individually, but two persons stand out: Joe Edkin and Mary Mitchell.

Joe should have moved in with us; he was here that often, helping clean up the house, cook, tend to Kim, staying with her all night sometimes to spell me. Nothing was beneath him, nothing seemed to faze him.

Mary Mitchell is an amazing person, More than anyone else, she battled the cancer with Kim and me. She moved in with us when we first bought our house some three years back and I literally cannot conceive how I would have been able to care for Kim without her. She matched me and often surpassed me in courage and strength. She and Joe did more for a friend than many people would do for kin. The only reason I can discern is they simply loved her.

It was love, more than any other single thing, that marked Kim's final days. Not pain, not fear, not sorrow — although those were all present, as well. Simply love.

As I related earlier, we had to take Kim into the hospital to manage the pain the week before she died. The nurses on the floor, in all the shifts, knew Kim and loved her. She was famous (or infamous) for her Tyrano Toes — fuzzy slippers in the shape of Godzilla's feet that had a sound chip in them that either roared like Godzilla or sounded like buildings being crushed when you stomped on the heel — which Kim frequently did in her hospital stays. She also had a green paisley robe and, wearing that and the Tyrano Toes and her bald head from chemo or radiation, she would go out in the hall doing her Yul Brynner act from *The King and I*.

Kim never bothered with wigs or turbans when treatments made her go bald. Floppy hats when she went outdoors, maybe. A cloth cap when her noggin felt cold, OK. More often than not, she would adorn her bald head with temporary tattoos. For the record, Kim looked good bald.

Her basic attitude was: If I have a lemon, I want first class lemonade. After her twin mastectomies, she kept threatening to go to the beach topless. "What are they going to do — arrest me?" she demanded. "For what? There ain't nothing there!"

As Kim's final week progressed, she was slipping further and further away. She straddled two worlds and sometimes, when she was awake, her actions and her words seemed to relate more to the next world than this one. Not all the time. I was sitting next to her at one point, holding her hand, watching her. I was never so fully, so completely in love with Kim as during those final days, I smiled, sitting there and watching her. At first, her eyes were focused elsewhere — beyond — but then she fixed on my face and then she gave me this beautiful smile in return and I fell in love with her all over again.

Later, it was just me and Mary in the room with her. I was holding her hand again and then she gradually took my one hand in both of hers, then lifted it to her mouth and covered it with small kisses. I melted.

Friends and family came from all over when I put out word that Kim was failing fast. For every one who came, there must have been 20 or 30 who wanted to be there. The nurses said they had never seen one patient have so many visitors or phone calls. We had to rotate people in and out of the room because of space limitations. The others would sit in the family waiting room, which we took over, and talked and, yes, even laughed a lot. There were — there are — so many stories to tell.

People asked me if I wanted more time alone with Kim and I said, no, I was staying there nights with Kim, as well, so I had plenty of time alone with her. What I truly loved to see was others with her, to see all the love that was felt for Kim. It was love that marked her life. As fine a writer as she was (as readers of this column well know), her greatest work of art was her life itself and how she affected people.

Her importance to comics as a medium exceeded the relatively small output of her writing. It lies in her love and passion for the medium, the desire to see it fulfill its potential, to reach beyond the narrow confines of a dwindling readership. She wanted to see it reach out to everyone, not just one segment. She fought especially for the role of women in comics, to see it validated, to have comics reach out more to a female readership. She saw such possibilities and it frustrated her that others didn't share that vision or were so slow to pursue it.

Kim's importance to comics lies in the people whom she championed, whom she befriended, whom she believed in, whom she affected so deeply — and who are her truest legacy to the medium.

I don't believe Kim is gone. She's simply not physically here. Whatever your own beliefs may be about an afterlife, I was with Kim at the end and I know what I saw and she was going somewhere. When her life ended, in a very real and basic way, mine did, too. She was my wife, my love, my lover, my partner, my best friend, and my life was based on growing old with her and that's not going to be. I'm starting a new life now, not by my own choosing, but — taking my cue from Kim — I'll try to make the best lemonade from this lemon that I can. I'm still learning from her, you see. I'm still chasing after her with that wheelchair.

Kim Yale's husband, John Ostrander, writes for comics.

TRADERS

Trader ads are available for $40.00 each. Traders are designed by the advertiser on 8-1/2" x 8-1/2" paper. We reduce the ad to 3-1/4" x 3-1/4" size. Trader ads are a low cost form of advertising. Because of this, CBG does not typeset, screen photos, add logos, artwork or credit card symbols to Trader ads.

Trader Tips

The Trader ads in CBG are an easy and economical way to advertise. Simply design your ad in a space that is 8½" wide by 8½" high and send it along with payment ($40.00 per Trader space) and complete reference form to:

COMICS BUYER'S GUIDE
Advertising Department
700 E. State Street
Iola, WI 54990-0001

We'll reduce your ad to the proper size and place it in the issue(s) you request. If no specific issue(s) is requested, we'll run your ad in the next available issue.

Keep in mind that CBG does not typeset, screen photos, add logos, artwork or symbols to Trader ads. The better your ad looks when you send it to us, the better it will look when it is reduced and published in CBG.

Krause Publications, Inc. reserves the right to decline advertising or suspend advertising privileges for such periods of time as in its discretion it sees fit, for any reason, whatsoever, irrespective of the validity of the reasons for such declination or suspension. The forwarding of an order is construed as acceptance of all rates and conditions in effect at the time the advertising is submitted. The publisher will not be bound by any conditions, printed or otherwise, appearing on any order for advertising space, billing instructions or copy instructions which conflict with its policies. Advertisers and advertising agencies assume liability for all content (including text representation and illustrations) of advertisements printed, and also assumes responsibility of any claims arising therefrom made against the publisher. It is the advertiser's or agency's responsibility to obtain appropriate releases on any item or individual pictured in their advertising. After Peter David asked in ***CBG*** #1218 why Princess Leia didn't just e-mail or copy and distribute the Death Star plans she was taking to the Rebellion, I figured it was time to hit the books.

While the film didn't address the topic, the radio show did. According to Brian Daley's 1980 play (published in 1994 as *Star Wars: The National Public Radio Dramatization*), rebels on an Imperial factory world were discovered while uploading the Death Star plans to Leia in orbit. Leia's ship *immediately* went to hyperspace after the upload was completed, bound for Tatooine and Obi-Wan Kenobi, whom she was supposed to pick up. Seconds after arriving, her ship was followed by a Star Destroyer which quickly jammed her broadcasts. Leia realized a traitor with a tracking device was aboard and nixed the idea of copying and distributing the file to the crew. She chose only Artoo — who had helped her before — to find Kenobi.

Instant communication exists in the *Star Wars* universe — but resolution is apparently poor, turning the Emperor into another actor during his *Empire Strikes Back* appearance. By Daley's script, Leia would only have had time to e-mail the file from hyperspace, and it'll take somebody out there with a *Star Wars* technical manual to say if that's possible.

(Daley's script also explains the fate of R5-D4 — "Skippy the Jedi Droid" from David's column in ***CBG*** #1219 — but Peter's explanation is more fun!)

Once upon a time, one had to be face to face in order to have social intercourse. (Remember, kids, be careful when having social intercourse: When you talk to a person, it's as if you're talking to everyone that person has ever spoken to.) Now, however, you have the solitude of computer terminals and are able to hide behind fake names and even fake locations.

The anonymity can have curious and fascinating spin-offs. Herewith an intriguing anecdote of the new age of Isolinear Isolation. I have changed the names of those involved, hopefully to protect them from further public embarrassment.

•

It was about 6 in the morning on Sunday and I had worked all night. But I was too awake to sleep, so I decided to jump onto AOL and see if anyone was around. I found a chat room where a group of comics fans had gathered. As is customary, everyone was using fake names. I started talking with one of them, while at the same time watching some of the cross-talking going on.

(Keep in mind, I am using different names than the real participants were using, while trying to keep the flavor of those actually involved. In doing so I'm probably going to wind up using names of other AOL participants who *genuinely* go by those handles. To paraphrase the old warning: **Any resemblance to the names of actual fake people is purely coincidental.**)

One of the participants was Wonder Girl. Wonder Girl, as I noticed in various cross-talk comments, was about 14 and lived in the Bronx. Also present was Robin, who was doing some heavy-duty flirting with Wonder Girl. Wonder Girl was being coy in response. Robin wanted to go out with Wonder Girl, and Wonder Girl replied that she had a boyfriend: Flash Gordon.

"I'd fight him for you," declared Robin zealously. This went on for a bit, and then Wonder Girl announced that she'd be right back, because she was getting a phone call. Moments later, she wrote, "Guess what. That was Flash Gordon. Robin, you said you'd fight him for me. So he's coming online, so you two can fight it out. Well, I have to go the supermarket now. Bye."

And Wonder Girl vanished.

About 90 seconds later, Flash Gordon materialized, spoiling for a fight. "Who wants to fight me?" he thundered. "I'm looking for the guy who was interested in Wonder Girl. Come on. Who was it? Who wants to fight me for her?"

Robin the Gutless Wonder had lapsed into sudden silence, which was remarkable enough in itself. Who in the world is concerned about getting into a fight in cyberspace? What was Flash Gordon going to do? Punch out Robin? I mean, forget about walking the walk; if you can't talk-the-talk in cyberspace, where *can* you?

But Robin's sudden reticence was secondary to the obvious sham of what I was seeing. And as Flash Gordon continued to look for a fight, I said to the guy I was writing to, "Do you believe this silliness with Flash Gordon? Who does he think he's fooling?"

My comments caught Flash's eye. "What are you talking about?" he demanded.

I wrote back, "Oh, come on. It's perfectly obvious that you and Wonder Girl are the same person. That there is no Wonder Girl."

"That's ridiculous," he declared.

"Then where is she?" I asked.

"She had to go out food shopping," Flash informed me.

In retrospect, I shouldn't have been so blunt. I was dealing with a teen-ager here. But I hadn't slept all night, and my patience and judgment weren't what they should have been. Nor did I really, fully understand what I was getting into. I was simply carried along with the flow of the conversation, rather than really dwelling on the impact I was about to have on the person on the other end.

I wrote, "Let me get this straight. You're telling me that a teen-age girl had to go out food shopping. At 6 in the morning. On a Sunday. In the Bronx."

"There was probably something she needed," Flash wrote back.

"At 6 in the morning? On a Sunday? In the Bronx?"

"That's how girls are," Flash claimed defensively.

I wrote, "Aw, come on, Flash. You're asking me to believe that this girl just happened to be talking about you and then you just happened to call and then she just happened to leave as you just happened to get online? Don't you see what a stretch that is?"

"She knew she could leave because I was going to fight on her behalf and take on the guys who were coming on to her," explained Flash.

"Y'know, that's pretty odd, Flash," I replied. "Most teen-age girls I know, they would have stayed to watch their boyfriends mix it up with a guy to fight for their honor. But not Wonder Girl. No, she goes food shopping. At 6 in the morning. On a Sunday. In the Bronx."

Other people, noticing the cross-chat, started to comment on the unlikelihood of this, as well.

"We're two different people," Flash maintained forcefully. "Check our profiles. You'll see. There's different profiles."

Profiles, you have to understand, are descriptions that people create for themselves when they come online. They have no necessary adherence to reality at all. Nonetheless, I checked out both Flash Gordon's and Wonder Girl's profiles. Each of them provided detailed information and each of them also talked about each other in glowing, romantic terms. They also both mentioned a third person, Erik the Red, as a mutual best friend. I came back and wrote, "Yup. Two different profiles. You're right."

"You see?" wrote Flash triumphantly.

"Strange, though," I observed, "that there are identical grammatical mistakes and misspellings in both, which would indicate they were created by the same person."

And Flash Gordon freaked out.

He began doing the computer equivalent of screaming, typing entirely in capital letters, "WE'RE NOT THE SAME PERSON! WE'RE TWO DIFFERENT PEOPLE!" Profanity-ridden postings screeched across the computer screen.

Now, as I noted, I was sleep-deprived. I was even starting to drift off a bit, the main thing keeping me awake being the clattering of the keyboard. But this snapped me back to full wakefulness. This was no longer a mental exercise. This was a complete meltdown. A line had been crossed from chat into psychodrama. Realizing that Flash Gordon had lost it, other people in the chat room started to move in for the kill, and I immediately started reining them back, sending them private messages along the lines of, "We better give him some space, fast." Publicly, I typed as quickly as I could, "OK, Flash, you're two different people. Fine. You win. I'm sorry I thought otherwise. My mistake." And Flash seemed to calm back down.

I had never seen anything like it. It had caught me completely off-guard. Later, one of the AOL regulars explained to me that it wasn't uncommon at all. The term for it is "loner's syndrome."

Imagine yourself as a classic misfit. You have almost no friends, no social life. You're an outcast, you can't get a date, you're socially inept, girls won't give you the time of day. In short, you're what I was like during junior high and the first two years of high school.

And so you flee to the last bastion of societal anonymity. You go to AOL.

And there you create an identity for yourself. Brave. Heroic. Dashing.

But that's not enough. You want the folks on AOL to think you're a cool guy. That you're da bomb (and boy, isn't it funny how *that* phrase didn't exist in a positive connotation when I was a kid, when we were concerned about someone dropping Da Bomb). How do you come across as cool to the other guys? Easy. By having a babe for a girlfriend.

So you create a girlfriend: an aggressive flirt, coy and teasing, who only has eyes for you. Makes the other guys jealous and elevates you because, hey, there must be something great about you if this hot chick considers you her one-and-only. And you also fabricate a best friend, just to show you can hang with the guys, as well. In short, you create an entire social life for yourself — and it's just you.

On the one hand, I can sit here in judgment, separated by several decades from the state of mind that would lead to such actions. On the other hand, I can't help but note that I create characters for a living — and, if there had been computers when I was a teen-ager, I might have done the same thing.

So the moral of the story is: If you're going to make up other identities, be a little more slick about it.

Peter David, writer of stuff, can be written to at To Be Continued Inc., P.O. Box 239, Bayport, NY 11705. Letters can also be addressed there to his eldest son Rex, his hot mistress Gabrielle, his talking dog Cuddles, and, of course, Skippy the Jedi Droid. Next week: More on-line adventures.
